FUND MANAGER COMMENTARY AT 30 JUN 2025

The first half of 2025 contained valuable lessons for investors, as markets plunged precipitously and then staged a remarkable V-shaped recovery. First is the importance of keeping a cool head under pressure. Experience helps in this regard; once you have lived through multiple crises, subsequent events become easier to deal with (easier, but never easy!). For each new episode, the cry is always "But this time is different!" While this is true — every episode does have its nuances — human nature and the cycles of greed and fear **never** change. Once you realise this, you start to analyse the game at a meta level — instead of analysing the minutia of events and trying to forecast the future (e.g. "What happens to US GDP when average tariffs are X%") — you interrogate the actions of the players and market participants. The second lesson is that **earning investment returns is not supposed to be easy**. The next time the market sells off, which it inevitably will, remind yourself that the pain you are feeling is the price that **must** be paid to earn returns. Third, having a long-term investment time horizon is not only a necessity, but a superpower. Fourth, while bears win the occasional battles, their victories tend to be pyrrhic and short-lived. History has favoured the optimists, the bulls, the bold. If you have read our commentaries for the past decade, you will know which camp we fall in. Long may the bulls prevail!

FEE DETAILS

	Class A
Initial fees (BCI) (incl. VAT)	0%
Annual Service Fee (incl VAT)	0.29%
Underlying Investment fees (levied in the Anchor Global Equity Fund)	1.25%
Performance Fee	None
TER and Transaction Cost (incl VAT)	
Basic	Mar 25: 1.73% (PY): 1.76%
Portfolio Transaction Cost	Mar 25: 0.00% (PY): 0.00%
Total Investment Charge	Mar 25: 1.73% (PY): 1.76%

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. The TIC should not be considered in isolation as returns may be impacted by many other factors including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and Transaction Cost calculations are based upon the portfolio's direct costs for the financial year ended 31 December 2024, whilst the underlying portfolios ratio and cost calculations are based upon their most recent published figures, being 31 March 2025.
