**About the Fund**

**Investment Policy**
In order to achieve this investment objective the securities normally to be included in the portfolio will primarily consist of property shares, REITs, financial instruments, assets in liquid form and non-equity securities which are considered consistent with the portfolio’s primary objective and that the Act or the Registrar may allow from time to time, all to be acquired at fair market value.

**Investment Objective**

The CATALYST SA PROPERTY EQUITY PRESCIENT FUND is an actively managed portfolio, which has a total return objective and seeks to offer investors a return in excess of South African Domestic property equity markets. The portfolio has a medium to long-term investment horizon.

**Monthly Commentary**

The SA Listed Property Index (SAPY) and the All Property Index (ALPI) recorded total returns of -2.97% and -4.02% respectively for the month of September, with the historic yield of the ALPI ending the month at 8.4%. However, it should be noted that many companies have reduced, deferred or canceled dividend payments in the aftermath of the covid-19 pandemic. The yield-to-maturity (YTM) on the Long-Term South African government bond (RLRS) weakened by 15bps ending the month at 9.50% (9.35% - 31 August 2020). During the quarter, all major asset classes (apart from cash) delivered negative returns with the All Property Index (ALPI) and the SA Listed Property (SAPY) underperforming the other asset classes. The All Property Index (ALPI) continues to underperform other asset classes on a rolling 12-month period (-47.24%), with SA Cash outperforming with returns of (6.20%), followed by SA Bonds (3.58%) and SA Equities (2.01%).

The results reported over the period while exhibiting a substantial drop in earnings was largely expected given the severity of the lockdown restrictions during March to June 2020. All REITs provided some relief to tenants during the lockdown period through either rent discounts and/or deferrals. Based on GDP forecasts, South Africa is expected to have a gradual recovery and we expect the property market to follow a similar trajectory. As lockdown conditions have continued to ease, we have seen a gradual improvement in collection rates. However, they remain below pre-Covid levels. We anticipate that some relief through rent discounts/deferrals will be evident for the duration of the calendar year and into next year. Due to this continued uncertainty, many property companies have either postponed dividend declarations or implemented a payout ratio to conserve cash.

Our forecasted forward funds available for distribution (FAD) is 11.12%, but we are forecasting continued pressure on rent collections and elevated gearing positions to impact on the actual dividends declared. We expect moderate growth off this low base taking the fixing of elevated gearing, lower GDP and lower short-term inflation forecasts into account which has translated into lower market rental growth across most sub-sectors. Our 5-year annualised total return forecasts for the sector ranges between 16% and 20%.

SPECIFIC FUND RISK

- Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.
- Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.
- Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.
- Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.
- Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.
- Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.
### TERM MEANING

- **Annualised performance**: Annualised performance shows longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
- **Highest & Lowest return**: The highest and lowest returns for any 1 year over the period since inception have been shown.
- **NAV**: The net asset value represents the assets of a Fund less its liabilities.
- **Co-named Collective Investment Scheme**: A portfolio approved and branded in the name of both the manager (Prescient Management Company) and the financial services provider (Catalyst Fund Managers) and where the financial services provider undertakes the function of discretionary financial services in relation to the assets of the portfolio.
- **Income Distribution**: The interest and/or dividend income that is generated by the underlying investments in the Fund and that is declared and distributed to investors in the Fund periodically.

### DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor’s fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund’s Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund’s underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 1300 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.catalyst.co.za.
