

INVESTMENT OBJECTIVE

The fund aims to provide investors with a net-of-fee return of 5% per annum above the annual change in the South African Consumer Price Index, measured over rolling three year periods. Exploiting the benefits of global diversification, the portfolio continually reflects Food's prevailing best investment view on all available asset classes in South Africa and around the world.

INVESTOR PROFILE

Investors with a moderate risk profile who require long-term inflation beating total returns from a dynamically managed multi-asset class portfolio. It is appropriate for investors seeking a balanced exposure to domestic and foreign assets, according to Food's best investment view. Available as a tax free investment account.

SIGNIFICANT RESTRICTIONS

None. The fund is unconstrained.

INCOME DISTRIBUTIONS

End-March and end-September each year.

INCOME CHARACTERISTICS

Low to medium income yield depending on the asset allocation strategy employed as the foreign asset component is invested in roll-up funds which do not distribute their income. Income distributions are reduced by the annual service charge, which varies with the relative performance of the fund against its benchmark.

PORTFOLIO ORIENTATION

Exploiting the benefits of global diversification, the portfolio continually reflects Food's prevailing best investment view on all available asset classes in South Africa and around the world.

FOREIGN ASSETS

Foreign asset exposure is obtained predominantly via Foord International Fund (a conservative, multi-asset class fund) and Foord Global Equity Fund Luxembourg (a portfolio of global shares and cash). Both funds are sub-funds of Foord SICAV domiciled in Luxembourg, and are priced in US dollars.

RISK OF LOSS

Lower than that of a pure equity fund. High in periods shorter than six months, lower in periods greater than one year.

TIME HORIZON

Longer than three years.

PORTFOLIO PERFORMANCE VS BENCHMARK

INVESTMENT STRATEGY VS REG 28 PORTFOLIOS

Unconstrained investment mandates provide Foord with more investment tools to achieve long-term inflation beating returns and to better manage the risk of loss compared to prudentially compliant (Regulation 28) portfolios. Accordingly, unconstrained mandates are ideal for discretionary savings that are not required to be invested in terms of Regulation 28 limits. The Investment Strategy vs Regulation 28 Portfolios chart compares the investment returns of the unconstrained Foord Flexible Fund of Funds to Regulation 28 mandates managed by Foord (the Foord Balanced Fund returns are net of fees and therefore have been used for direct comparative purposes). The chart shows that the Foord Flexible Fund has outperformed the Foord Balanced Fund by 2.1% per annum since its inception, illustrating the long-term opportunity cost of investing discretionary savings in a Regulation 28 portfolio.

FEE STRUCTURE

The annual fee is based on portfolio performance fee with the daily fee rates being adjusted up or down based on the portfolio's one-year rolling return relative to that of its benchmark and is subject to a minimum fee rate.

PERFORMANCE FEES

Performance fees align investor and manager return objectives by rewarding the manager for outperformance while penalising the manager for underperformance. Foord's performance fee structure increases or decreases the daily fee levied based on the over- or underperformance of the Foord unit trust portfolios relative to their benchmarks. When the portfolio return exceeds the benchmark return, the daily performance fee rate is increased proportionately. Similarly, underperformance causes the daily performance fee rate to decrease proportionately. Performance fee rates are not capped for the reason that outperformance is generally not earned smoothly.

The annual fee is adjusted up or down daily by the performance fee calculated as the difference between the rolling one-year net-of-fee return and the benchmark return for the same period, multiplied by the performance fee sharing rate.

IMPORTANT INFORMATION FOR INVESTORS

ISIN Number: ZAE000116539

Foord Unit Trusts (RF) (Pty) Ltd (Foord Unit Trusts) is an approved CISCA Management Company (#10), regulated by the Financial Sector Conduct Authority. Portfolios are managed by Foord Asset Management (Pty) Ltd (Foord), an authorised Financial Services Provider (FSP: 578). The custodian/trustee of Foord Unit Trusts is RMB Custody and Trustee Services (a division of FirstRand Bank Limited), contactable on T: 087 736 1732, F: 0860 557 774, www.rmb.co.za.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Performance is calculated for the portfolio. Individual investor performance may differ as a result of the actual investment date, the date of reinvestment and withholding taxes. Performance may be affected by changes in the market or economic conditions and legal, regulatory and tax requirements. Foord Unit Trusts does not provide any guarantee either with respect to the capital or the performance return of the investment. Unit trusts are traded at ruling prices and can engage in borrowing. Foord Unit Trusts does not engage in scrip lending. Commission and incentives may be paid and if so, this cost is not borne by the investor. A schedule of fees and charges and maximum commissions is available on request. Distributions may be subject to mandatory withholding taxes. Portfolio information is presented using effective exposures. A fund of funds invests only in other Collective Investment Scheme portfolios, which may levy their own charges, which could result in a higher fee structure. A feeder fund is a portfolio that, apart from assets in liquid form, consists solely of units in a single portfolio of a Collective Investment Scheme which could result in a higher fee structure. Foord Unit Trusts is authorised to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate.

UNIT PRICE

Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio. Forward pricing is used. Prices are determined at 15h00 each business day and are published daily on www.foord.co.za and in national newspapers. The cut-off time for instruction is 14h00 each business day.

TER

A Total Expense Ratio (TER) is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average daily value of the portfolio. These expenses include the annual fee, VAT, audit fees, bank charges and costs (excluding trading costs) incurred in any underlying funds. Included in the TER, but separately disclosed, is a performance fee (or credit) resulting from overperformance (or underperformance) against the benchmark. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Performance return information and prices are always stated net of the expenses, fees and charges included in the TER. The TER for the fund's financial year ended 31 March 2023 was 0.76%.

FOREIGN INVESTMENT RISK

The portfolio may include underlying foreign investments. Fluctuations or movements in exchange rates may cause the value of underlying foreign investments to go up or down. The underlying foreign investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities in the relevant countries.
