Repurchase period	3 working days

Fund Objective

The fund aims to provide a high level of income whilst maximising returns above cash over a 2 year period. Capital preservation is of primary importance and is achieved through the diversification across a variety of high yielding assets and a selection of skilful investment managers with complementary strategies. The fund is Regulation 28 compliant. The investment manager will also be allowed to invest in financial Instruments (derivatives) as allowed by the Act from time to time in order to achieve its investment objective.

Risk Profile (Conservative)

This portfolio aims to ensure stable income flows and capital preservation is of primary importance. The portfolio invests in a combination of low-risk asset classes, but exposure to equities is limited to protect against volatility and risk of capital losses. It aims to provide a high level of income, while maximising returns above cash. Capital preservation is achieved through diversification across a variety of high yielding assets.

Fees (excl VAT)	Retail-class
Initial fee	0.00%
Advice Annual fee	Neg.*
Annual Management fee*	0.85%
Total Expense Ratio (TER)	1.11%

* Advice fee | Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor.

* This fund is also available via certain LISPS (Linked Investment Services Providers), who levy their own fees.

Obtain a personalised cost estimate before investing by visiting www.sanlamunittrustsmdd.co.za and using our Effective Annual Cost (EAC) calculator. Alternatively, contact us at 0860 100 266.

PERIOD: 01 January 2022 to 31 December 2024

Total Expense Ratio (TER) | 1.11% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Cost (TC) | 0.02% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER + TC) | 1.13% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

*Effective 1 December 2024, SCI will charge a monthly administration fee of R23 (VAT inclusive) on retail investors whose total investment value is less than R50 000. Clients with an active recurring monthly debit order will not be levied this fee.

The fund manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Income funds derive their income from interest-bearing instruments as defined. The yield is a current yield and is calculated daily.

Portfolio Manager(s) Quarterly comment

Global equity markets plunged after US President Donald Trump's tariff announcement on Liberation Day, with many countries vowing to introduce retaliatory tariffs. Market volatility was further exacerbated by on-again/off-again tariff announcements. The trade war sparked fears of a US recession amid slowing growth, weak consumer sentiment, and sticky inflation. The rapid reordering of global trade dynamics caused tremendous confusion and unease among investors, weighing on global equity markets. Optimism for European equity markets were significantly evident largely because of Germany's fiscal spending plan and the region's efforts to lowering inflation to the target range.

Developed market (DM) equities recorded a modest gain in April, with the MSCI World Index ending positively at 0.89% month-on-month (m/m) in dollar terms, pushing them into positive territory. The month was characterized by significant market volatility, largely driven by geopolitical events, and in particular US tariffs. Emerging Market (EM) equities also ended April in positive territory at 1.34% m/m in dollars, partially attributed to US dollar weakness. Both global property and global bonds were in positive territory at 0.99% m/m and 2.94% m/m dollars. The FTSE Index lost -0.25% m/m in pounds with the decline continuing from the March figure of -2.25% m/m. The Euro Stoxx 50 Index ended in negative territory for the month at -1.80% m/m and the S&P 500 detracted for the month at -0.68% m/m. The Dow Jones Index was the biggest detractor for the month, ending in negative territory at -3.08% m/m in dollar terms. However, Japan's benchmark Nikkei clawed back some of its March losses, ending April in positive territory at 1.20% m/m in yen terms.

SA equity markets ended the month strongly in positive territory with the FTSE/JSE All Share Index up 4.34% m/m in rand terms, despite earlier declines in response to US tariffs. The JSE was further boosted by the easing of domestic political tensions as Finance Minister Enoch Godongwana scrapped the planned VAT increase of 0.5%. Property went from an underperformer in March to the biggest gainer in April at 7.58% m/m. Industrials and Resources both ended the month in positive territory at 2.44% m/m and 2.06% m/m respectively. Financials and Cash were both in positive territory at 4.61% m/m and 0.61% m/m respectively. The bond market was positive for short- and medium-term bonds in April but negative for long-term bonds, with the FTSE/JSE All Bond Index ending the month positively at 0.76% m/m. Bonds of 1-3 years were positive at 1.06% m/m along with bonds of 3-7 years at 1.78% m/m. Bonds of 7-12 were positive at 0.77% m/m, but bonds of 12 years and above ended in negative territory at -0.28% m/m. The rand was one of the few currencies that weakened against the US dollar in April at -1.15% m/m, largely attributed to uncertainty over the stability of the GNU and strained relation with the US. The rand also weakened against the euro and pound at -6.07% m/m and -4.48% m/m respectively.

Additional Information

All reasonable steps have been taken to ensure the information on this MDD is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Bank of South Africa Ltd is the appointed trustee of the Sanlam Collective Investments Scheme. The Manager retains full responsibility for the co-named portfolio.

Graviton is responsible for the management of the investments held in the Fund. The management of investments are outsourced to Sanlam Multi Managers International (Pty) Ltd (FSP) Licence No. 845, an Authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act, 2002.

* The highest and lowest 12 month returns are based on a 12 month rolling period over 10 years or since inception where the performance history does not exist for 10 years.

Performance figures are sourced from Morningstar.

Glossary of Terms

Annualised total returns

Annualised return is the weighted average compound growth rate over the period measured.

Diversification

This is a strategy designed to reduce risk within a portfolio by combining a variety of investments (or asset classes) such as equities, bonds, cash or property, which are unlikely to all move in the same direction. This is designed to reduce the risk (and protect against capital losses) within a portfolio. Diversification allows for more consistent performance under a wide range of economic conditions as it smoothes out the impact of negative market events. The positive performance of some investments or asset classes should neutralize the negative performance of others.

Multi-managed solution

Multi-managed investing combines a range of investment managers with complementary styles, across different asset classes. The risk of the investors' portfolios is reduced as a result, without impacting on the overall long-term returns.

It is based on the premise that no one manager is likely to perform well in all market conditions and all circumstances.

Regulation 28

Regulation 28 of the Pension Funds Act sets out prudent investment limits on certain asset classes in investment funds. It applies specifically to investments in Retirement Annuities and Preservation Funds.

The allowed maximum exposures to certain asset classes is:

- 75% for equities
- 25% for property
- 45% for foreign (offshore) assets

Sharpe ratio

The Sharpe ratio measures risk-adjusted performance of an investment or portfolio. It measures the amount of risk associated with the returns generated by the portfolio and indicates whether a portfolio's returns are due to excessive risk or not. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance has been (i.e. a higher return with a contained risk profile, where the portfolio manager is not taking excessive risk to achieve those returns).

Standard deviation

Standard deviation (also called monthly volatility) is a measure of how much the returns on an investment change from month to month. It is typically used by investors to gauge the amount of expected volatility in an investment.

Tax Free Unit Trust

This fund qualifies as a tax free investment according to section 12T of the Income Tax Act, with effect from 1 March 2015. South African individuals qualify for the associated tax benefits namely no tax on dividends, income or capital gains whilst still enjoying all the benefits of a unit trust. Note contributions to tax free investments are limited to R36 000 per tax year, with a lifetime limit of R500 000. Amounts invested in excess of these permissible thresholds are taxable.

Total Expense Ratio (TER)

This refers to the total costs associated with managing and operating an investment's administration, financial planning and servicing fees. Costs consist of management fees and expenses such as trading, legal and auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.
