

As of 2020/07/31

INVESTMENT OBJECTIVE & POLICY

The objective of this portfolio is to provide investors with long-term capital growth through investment in a diversified range of global asset classes and currencies. The portfolio aims to produce an equity like return over the long-term but with less risk than equity markets; its broad mandate allows it to invest across asset classes and the capital markets, in a variety of market caps, geographies and sectors. Investments to be included in the portfolio will, apart from assets in liquid form, consist solely of participatory interest in portfolios of collective investment schemes. The portfolio will consist of a mix of collective investment scheme portfolios investing in equity, fixed interest instruments, (including but not limited to bonds, cash deposits and money market instruments), debentures, preference shares and property securities as well as any other income enhancing securities which are consistent with the portfolios objective and that the Act may allow. The Manager shall be permitted to invest on behalf of the portfolio in offshore investments as legislation permits. The Manager may also invest in derivatives as allowed by the Act from time to time.

FUND FACTS

Fund Classification	Global MA Flexible
Risk Profile	Aggressive
Benchmark	Global Flexible
Inception Date	23 May 2018

Advice fee - Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor.

Period: 23 May 2018 to 31 March 2020

Total Expense Ratio (TER): 2.42% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.

Total Expense Ratio (TER) 1 year rolling: 1.62%

Transaction Cost (TC): 0.08% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER+TC): 2.50% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

Issue Date: 14 August 2020

DISCLAIMER

All reasonable steps have been taken to ensure the information on this minimum disclosure document is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision. The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performances are not necessarily a guide to future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign instruments which could be accompanied by additional risks as well as potential limitations on the availability of market information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Bank of South Africa Ltd is the appointed trustee of the Sanlam Collective Investments Scheme. Sanlam Collective Investments is responsible for the administration of investments in the portfolio and retains

GLOSSARY TERMS

Capital preservation

This is an investment strategy where the primary goal is to preserve (protect) capital and prevent losses in a portfolio. Preserving capital is a priority for retirees and those approaching retirement, since they may be relying on their investments to generate income to cover their living expenses, and have limited time to recoup losses if markets experience a downturn.

Capital Volatility

Volatility is a measure of 'risk', and refers to the extent to which the price of an investment or capital value fluctuates over a certain period of time. Funds with a high volatility usually offer the potential for higher returns over the longer term than low volatility funds.

Fund of Funds

A "fund of funds" is an investment strategy of holding a portfolio of other investment funds rather than investing directly in stocks, bonds or other securities. This type of investing is often referred to as multi-manager investment. Investing in a fund of funds may achieve greater diversification. The benefit of diversification is that it can reduce volatility and the overall risk in the portfolio, while maintaining returns.

Regulation 28

Regulation 28 of the Pension Funds Act sets out prudent investment limits on certain asset classes in investment funds. It applies specifically to investments in Retirement Annuities and Preservation Funds.

The allowed maximum exposures to certain asset classes is:

- 75% for equities
- 25% for property
- 30% for foreign (offshore) assets & 10% African Assets.

Total Expense Ratio (TER)

This is the total costs associated with managing and operating an investment (excluding administration, financial planning and servicing fees). These costs consist primarily of management fees and additional expenses such as trading fees, legal fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.

Annualised return is the weighted average compound growth rate over the period measured.

Cumulative return is aggregate return of the portfolio for a specified period.

full legal responsibility for this portfolio. Megafin (Pty) LTD is responsible for the management of the investments held in the Fund. A fund of fund unit trust only invests in other unit trusts, which levy their own charges, which could result in a higher fee structure for these funds. The fund manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Asset allocation may be lagged between 1 – 3 months. This fund is also available via certain LISPS (Linked Investment Services Providers), who levy their own fees.

FAIS Conflict of Interest Disclosure

Please note that in most cases where the Financial Services Provider (FSP) is a related party to the portfolio manager, the FSP/distributor may earn additional fees other than those charge by the portfolio manager. It is the FSP's responsibility to disclose such additional fees to the investor.
