Momentum outcome-based investing philosophy

Investment success is about consistently meeting an investor’s investment needs – whether that be to generate an income stream in retirement, preserve capital or simply to grow wealth within the parameters of a certain risk profile.

In order to maximise that probability of an investor reaching their desired objective, Momentum has built a leading range of outcome-based investment solutions that set their sights beyond mere benchmarks and instead focus on the things that matter the most to investors, ensuring they achieve their investment goals.

Fund profile and investment strategy

The fund is a low to moderate risk, largely domestic, flexible income portfolio which aims to deliver STeFI plus 1% through the interest rate cycle. The fund is suited to investors who require a regular, reliable source of income while being prepared to take some risk in exchange for modest capital gains. The fund has a flexible income mandate under a multi-manager approach which allows for investment across the fixed income universe including property. Offshore allocations of up to 25% and an additional 5% in Africa provide further return opportunities and diversification. Multi-management provides diversification benefits through different investment styles and strategies.

Specific risks

Modified duration (Interest rate risk) which is fully flexible can result in relatively significant short term capital volatility. Permanent capital loss for investors is possible if an issuer of one of the instruments held in the fund defaults. This portfolio is permitted to invest in foreign securities which, within portfolios, may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

Investment objective/policy

The Momentum Diversified Income Fund is a specialist multi managed income portfolio with an objective to achieve a high level of sustainable income and stability of capital invested. In order to achieve its objective, the investments normally to be included in the portfolio may comprise a combination of assets in liquid form, money market instruments, bonds, cash deposits, corporate debt, listed property, listed preference shares, non-equity securities and any other securities which are considered to be consistent with the portfolio's primary objective, all to be acquired at fair market value. The portfolio may from time to time invest in financial instruments, in order to achieve the portfolio's investment objective. The manager may also include unlisted forward currency, interest rate and exchange rate swap transactions. With the purpose to seek opportunities to enhance the portfolio's income return, the portfolio may also invest in non-equity securities such as equity linked notes that are exposed to price movements in the equity markets and as well as derivative instruments such as futures and options linked to the equity exposure of equity linked notes. The portfolio may also include participatory interests or any other form of participation in portfolios of collective investment schemes or other similar schemes in the Republic of South Africa. Where the aforementioned schemes are operating in territories other than South Africa, participation in these schemes will be included in the portfolio only where the regulatory environment is of a sufficient standard to provide investor protection at least equivalent to that in South Africa and which is consistent with the portfolio's primary objective.

Fund limits and constraints

- Maximum exposure limits as per the ASISA fund classification structure.
- Minimum domestic assets equal to 70%.

Disclosures

Momentum Collective Investments (RF) (Pty) Ltd (the “Manager”), registration number 1987/004287/07, is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. The Manager is the manager of the Momentum Collective Investments Scheme, and Momentum Metropolitan Holdings Ltd is a full member of the Association for Savings and Investment SA. Standard Bank of South Africa Limited, registration number 1962/000738/06, is the trustee of the scheme.

Momentum Diversified Income Fund is a portfolio of the Momentum Collective Investments Scheme and Momentum Outcome-based Solutions (Pty) Ltd, registration number: 2004/023064/07, an authorised financial services provider (“FSP”) under the Financial Advisory and Intermediary Services Act No. 37 of 2002 (“FAIS”), FSP number 19840, is the investment manager of this portfolio.

Momentum Diversified Income Fund is a portfolio that derives its income primarily from interest-bearing instruments. The yield (where present) is historic and calculated monthly. The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TER’s. The disclosed TER is shown as an annual percentage based on data for the period from 01 April 2021 to 31 March 2024. The Transaction Costs Ratio (TC) is the percentage of the net asset value of the Financial Product incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. The TC should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. The disclosed TC is shown as an annual percentage based on data for the period from 01 April 2021 to 31 March 2024. The Total Investment Charges (TIC) is the sum of the TER and the TC and is shown as a percentage depicting the annual costs relating to the investment of the Financial Product. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

All portfolio performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. All portfolio performance shown is net of the Total Investment Charges (TIC) but excludes any initial or ongoing advisory fees that may, if applicable, be charged separately. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. All portfolio performance figures quoted (tables and charts where present) are as at 30 April 2024, based on a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month. Cash figures, where present, are STeFI Composite Index returns. All figures quoted in ZAR. Source: Morningstar and/or Momentum.

CIS are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of units apply to portfolios, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the Manager. The Manager reserves the right to close and reopen certain portfolios to new investors from time to time in order to manage them more efficiently in accordance with their mandate. This portfolio is valued daily at approx. 15h00. Latest prices can be viewed at www.momentum.co.za/collectiveinvestments and in some national newspapers. Forward pricing is used. Instructions must reach the Manager before 14h00 to ensure same-day value. The Manager does not provide any guarantee, either with respect to the capital or the return of this portfolio. Additional information on the proposed investment including, but not limited to, brochures, application forms and the annual report and any half yearly report can be obtained, free of charge, at www.momentum.co.za/collectiveinvestments or on request from the Manager.
