Momentum outcome-based investing philosophy

Investment success is about consistently meeting an investor’s investment needs – whether that be to generate an income stream in retirement, preserve capital or simply to grow wealth within the parameters of a certain risk profile.

In order to maximise that probability of an investor reaching their desired objective, Momentum has built a leading range of outcome-based investment solutions that set their sights beyond mere benchmarks and instead focus on the things that matter the most to investors, ensuring they achieve their investment goals.

Fund profile and investment strategy

The fund is a low risk, domestic only, fixed income portfolio which aims to outperform the STeFI Composite Index +0.5% over rolling one-year periods. The fund is suited to investors with a low risk profile seeking the highest possible income yield with capital stability a further aim. The fund retains many of the characteristics of a typical money market fund, but a more flexible mandate increases the universe of investable securities. Additional credit risk and the ability to capture term premiums in longer dated instruments allows for the potential for enhanced returns with a commensurate increase in risk.
