### 📄 Momentum outcome-based investing philosophy

Investment success is about consistently meeting an investor's investment needs – whether that be to generate an income stream in retirement, preserve capital or simply to grow wealth within the parameters of a certain risk profile.

In order to maximise that probability of an investor reaching their desired objective, Momentum has built a leading range of outcome-based investment solutions that set their sights beyond mere benchmarks and instead focus on the things that matter the most to investors, ensuring they achieve their investment goals.

### 📄 Investor profile and investment strategy

This fund is a high equity, multi-asset-class fund of funds with the objective of delivering a consistent real total return after deduction of fees above inflation plus 5% a year over six-year rolling periods. The fund is aimed at investors who have an intended investment horizon of six years or longer. It has a medium- to long-term investment horizon and, therefore, the aim is to maintain a high exposure to growth asset classes (local and global equities and property), with a small allocation to asset classes that should preserve the purchasing power of the capital accumulated. The fund consists of the full universe of asset classes, including global investments of up to 45%. Through the optimum selection of asset classes, the probability of achieving the outcome is maximised within acceptable risk parameters. It is suitable as a stand-alone fund where compliance with Regulation 28 is specifically required.

The Momentum Focus 6 Fund of Funds is a multi-asset Fund of Funds portfolio with the objective to secure consistent real returns net of fees in excess of inflation + 5% p.a. over rolling six year periods, through an investment strategy that is executed through a combination of active asset allocation and predominately active investment strategies. The portfolio will, apart from assets in liquid form, consist solely of participatory interests and other forms of participation in local and global collective investment scheme portfolios, or other similar schemes operated in territories with a regulatory environment that is of a sufficient standard to provide investor protection, at least equivalent to that in South Africa, and which is consistent with the portfolio's primary objective, investing in, equity securities, property securities, non-equity securities, money market instruments, preference shares, government and corporate bonds, inflation-linked bonds and other interest bearing securities and investments, listed and unlisted financial instruments and participatory interests in collective investment scheme portfolios. The portfolio will be managed in line with prudential investment guidelines for retirement funds in South Africa to the extent allowed for by the Act. To provide moderate to high long term real returns the portfolio's equity exposure will range between 50% and 75% of the portfolios net asset value. The portfolio may from time to time invest in listed and unlisted financial instruments for the purpose of hedging exchange rate risk in order to achieve the portfolio's investment objective. Nothing shall preclude the Manager from varying the ratios of securities or assets in liquid form in changing economic environment or market conditions, or to meet the requirements in terms of legislation and from retaining cash or placing cash on deposit in terms of the Deed and Supplemental Deed. The Trustee shall ensure that the investment policy is carried out. For the purposes of this portfolio, the manager shall reserve the right to close the portfolio to new investors.
