

CLOUD ATLAS AMI BIG50 ex-SA ETF MINIMUM DISCLOSURE DOCUMENT

Commentary

The Big 50 rebalanced for 2019Q3 we see the equity and bond markets affected by the US-China Trade war and fears of a global economic slowdown. Political elections across Africa usually see the bottoming out of company valuations, the weighted 12month forward PBV for the Big50 at 2.75x compared to S&P500 sitting at 2.77x. With the weighted 12 month forward PE for Big 50 at 10.4x vs the S&P500 at 14.76x.

Two constituents with a combined weighting of 2.95% have been replaced with constituents with a combined weighting of 2.89%. New additions: Telecom Egypt (2.51%) and Egyptian Satellites (0.37%). Removals: New African Properties (1.77%) and Global Telecoms (1.18%) which were removed due corporate actions. The old saying of Warren Buffet to buy somethings that's undervalued means we essentially see the next 12 months offering investors a return akin to that of a value investing portfolio.
