# Momentum outcome-based investing philosophy \_

Investment success is about consistently meeting an investor's investment needs – whether that be to generate an income stream in retirement, preserve capital or simply to grow wealth within the parameters of a certain risk profile.

In order to maximise that probability of an investor reaching their desired objective, Momentum has built a leading range of outcome-based investment solutions that set their sights beyond mere benchmarks and instead focus on the things that matter the most to investors, ensuring they achieve their investment goals.

# Fund profile and investment strategy \_\_\_

The fund is an SA equity portfolio that deliberately targets focused exposure to shares that exhibit robust price momentum with the aim to maximise returns over the FTSE/JSE Capped SWIX Index over time. A smart beta strategy is employed. The fund is suited to investors with a high-risk profile with a tolerance for capital volatility over the short to medium term and a long-term investment horizon. The fund will have no foreign exposure and is suited for investors who seek exposure to shares that exhibit robust price momentum at a

# Investment objective/policy \_\_\_

The Momentum Trending Equity Fund's objective is to achieve high long term capital growth by applying a momentum-based investment strategy to shares listed on the FTSE/JSE through a smart beta investment methodology. Smart beta refers to an investment style where the manager captures market factors to take advantage of perceived systematic biases or inefficiencies in the market. The Momentum Trending Equity Fund is an equity only portfolio that uses a systematic investment process. The portfolio deliberately targets focused exposure to shares that exhibit robust price momentum. Momentum is defined in terms of a composite of price momentum and earnings momentum as measured by analyst revisions. The universe of listed shares is screened on these momentum parameters. A portfolio with strong momentum factors is constructed on this basis. The portfolio aims to capture the equity market returns enhanced by the momentum risk premium. The exposure to qualifying shares that have strong momentum qualities will be optimized to have the maximum probability of achieving the desired outcome over a full market cycle. The portfolio's investment universe consists of South African equity and property securities, assets in liquid form and participatory interests and other forms of participation in local collective investment scheme portfolios. To provide high long term real returns the portfolio's equity exposure will be a minimum of 90% the portfolio's net asset value. The portfolio will have no foreign exposure. The portfolio may from time to time invest in listed and unlisted financial instruments, in accordance with the provisions of the Act and applicable legislation as amended from time to time, in order to achieve the portfolio's investment objective. Nothing shall preclude the Manager from varying the ratios of securities or assets in liquid form in changing economic environment or market conditions, or to meet the requirements in terms of legislation and from retaining cash or placing cash on deposit in terms of the Deed

The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TER's. The disclosed TER is shown as an annual percentage based on data for the period from 01 January 2021 to 31 December 2023. The Transaction Costs Ratio (TC) is the percentage of the net asset value of the Financial Product incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. The TC should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. The disclosed TC is shown as an annual percentage based on data for the period from 01 January 2021 to 31 December 2023. The Total Investment Charges (TIC) is the sum of the TER and the TC and is shown as a percentage depicting the annual costs relating to the investment of the Financial Product. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

All portfolio performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. All portfolio performance shown is net of the Total Investment Charges (TIC) but excludes any initial or ongoing advisory fees that may, if applicable, be charged separately. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. All portfolio performance figures quoted (tables and charts where present) are as at 31 March 2024, based on a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month. Cash figures, where present, are STeFI Composite Index returns. All figures quoted in ZAR. Source: Morningstar and/or Momentum.

CIS are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of units apply to portfolios, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the Manager. The Manager reserves the right to close and reopen certain portfolios to new investors from time to time in order to manage them more efficiently in accordance with their mandate. This portfolio is valued daily at approx. 15h00. Latest prices can be viewed at www.momentum.co.za/collectiveinvestments and in some national newspapers. Forward pricing is used. Instructions must reach the Manager before 14h00 to ensure same-day value. The Manager does not provide any guarantee, either with respect to the capital or the return of this portfolio.
