

Nedgroup Investments Global Flexible Feeder Fund

Class R

January 2019

INTERNATIONAL RANGE

RISK RATING

Risk reward profile

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. The portfolio is subject to currency fluctuations due to its international exposure.

1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month. Data source: © Morningstar Inc. All rights reserved.

2) Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/01/2016 and ending 31/12/2018.

Portfolio attributes

- This fund is a fully flexible, globally diversified fund with an emphasis on capital preservation
- The fund aims to provide an equity-like return over the long-term with less risk than the market while avoiding a permanent impairment of capital.
- In managing the fund, the fund managers seek to identify absolute value opportunities across asset classes, geographies and a company's capital structure.
- Stock selection and asset allocation are purely bottom-up and a function of a security's ability to provide an equity-like return at a price that provides a reasonable margin of safety at time of purchase.
- The manager constructs the portfolio in a high conviction manner without regard to the benchmark and therefore performance relative to the benchmark and peer group may deviate widely from time to time.

Investment manager

- FPA is a Los Angeles based asset management firm (which is independently owned by partners and employees) who aim to be the leading practitioner of value investing.
- FPA has been Sub-Investment Manager to the Nedgroup Investments Global Flexible Fund since June 2013 (previously Sub-Investment managed by Sarasin and Partners).
- The Global Flexible Fund is modelled on FPA's Contrarian Value Strategy.

Investment philosophy

- FPA aims to protect capital first, followed by creating long-term equity-like returns.
- They conduct independent and thorough research which incorporates an understanding of the macro-economic environment.
- FPA believes that volatility creates opportunity and not risk (which they define to be a permanent loss of capital).
- They have a long-term focus and are willing to accept short-term underperformance in exchange for long-term success.
- When risk assets do not sufficiently compensate investors for the risk of those investments, they are willing to be patient and hold cash until they do.

Who we are

Nedgroup Collective Investments (RF) Proprietary Limited, is the company that is authorised in terms of the Collective Investment Schemes Control Act to administer the Nedgroup Investments unit trust funds. It is a member of the Association of Savings & Investment South Africa (ASISA).
