1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month.

2) Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/01/2016 and ending 31/12/2018.

Portfolio attributes

- This is a concentrated fund holding approximately 30-35 shares that are listed on the South African equity market.
- The investment approach is industry, style and size agnostic, providing exposure to a broad array of small and mid-sized companies.
- The fund is managed by fundamental valuation-based equity investors with a highly active approach to portfolio management.
- The proprietary research generated by a team of equity specialists.
- The benchmark is used in portfolio construction primarily as a final risk management tool.

Investment manager

- Electus is an independent business owned predominantly by staff, with complete business and investment autonomy and extremely limited potential for conflicts of interest.
- They are focussed entirely focused on equity investing, with an unbroken 17 year track record.
- The founders of the company have extensive experience analysing stocks across the entire South African equity market.
- The company has enjoyed stable and persistent success, with a very attractive long-term, risk-adjusted return relative to the market and competitor funds.

Investment philosophy

- The fund manager begins with all JSE-listed shares and narrow the investable universe with a bias to shares demonstrating a sufficient level of liquidity.
- They systematically evaluate each share, utilising both absolute and relative valuation methodologies.
- They follow an unconstrained investment style, with flexibility to move actively between industries, sectors or themes.
- Portfolio construction is important given the concentrated ultimate list of holdings.
- They remain optimally positioned to capture excess return generating opportunities, within a risk-managed framework.
