

Nedgroup Investments Select Balanced Fund of Funds

Class A1

November 2022

SELECT RANGE

RISK RATING

Risk reward profile

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. The portfolio may be subject to currency fluctuations due to its international exposure.

Portfolio profile

The investment objective of the fund is to achieve moderate levels of capital growth above inflation over the medium to long term. The solution aims to achieve its objective through investment in a combination of five multi-asset funds in equal weights. Diversification across asset classes, fund managers and investment strategies, as well as a maximum equity exposure of 60% helps to reduce risk and volatility relative to an average prudential portfolio. Both the underlying funds and the overall portfolio are compliant with Regulation 28 of the South African Pension Funds Act.

¹ The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month.

² Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/10/2019 and ending 30/09/2022.

Portfolio attributes

The Select Fund of Funds range consists of simple, low-cost investment solutions that offer broad diversification across asset classes, fund managers and investment strategies, which can easily be incorporated into a financial planning process. Each solution is equally weighted across five fund managers. Rebalancing, back to the target weights of 20% per fund, takes place on a quarterly basis. Importantly, no performance fees are charged.

- 20% is invested in a low-cost, multi-asset fund that simply tracks the respective asset classes' market indices. The asset allocation of this fund is predetermined with total equity allocation at 35%. Actual exposure is rebalanced back to the predetermined weights on a quarterly basis.

- 80% is invested in four actively managed, multi-asset funds. Each of these fund managers have their own unique style and full discretion on asset allocation and stock selection.

As a combined solution the total equity exposure of the fund is maximum 60%. We believe these funds blended together will most consistently achieve the Select Balanced objective of outperforming SA inflation + 4% a rolling 5-year period, with the added benefit of lower volatility.

Investment manager

Nedgroup Investments Multi-Manager is a dedicated asset management division within Nedgroup Investments that consists of a diverse team of investment professionals based in Cape Town and London. We specialise in asset allocation and fund manager research and base our investment decisions on fundamentally-driven research.

Investment philosophy

We follow a long-term, valuation driven investment approach. Our investment philosophy is anchored to the following ten principles:

1. Long term investing, well considered.
2. Compounding is a powerful force.
3. Asset allocation is an important driver of returns.
4. Diversification has benefits.
5. Risks need to be properly understood.
6. The price you pay (valuation) is an important determinant of future returns.
7. Emotions can erode the value of rational decision making.
8. Costs are important.
9. Forecasting is difficult, assumptions need to be carefully considered.
10. Sound stewardship principles will improve odds of clients meeting their goals.

Who we are

Nedgroup Collective Investments (RF) Proprietary Limited, is the company that is authorised in terms of the Collective Investment Schemes Control Act to administer the Nedgroup Investments unit trust funds. It is a member of the Association of Savings & Investment South Africa (ASISA).
