APRIL 2021

RISK RATING

RISK REWARD PROFILE

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. The portfolio may be subject to currency fluctuations due to its international exposure.

INVESTMENT APPROACH

The fund of funds range consists of simple, competitively priced investment solutions that offer broad diversification across asset classes, fund managers, strategies as well as South African and international markets. Each solution is equally weighted across five fund managers and includes a passive building block. Rebalancing, back to the target weights of 20% per fund, takes place on a quarterly basis. Importantly, no performance fees are charged.

PORTFOLIO PROFILE

The investment objective of the fund is to achieve moderate levels of capital growth above inflation over the medium to long term. The solution aims to achieve its objective through investment in a combination of five multi-asset funds in equal weights. Diversification across asset classes, fund managers and investment strategies, as well as a maximum equity exposure of 60% helps to reduce risk and volatility relative to an average prudential portfolio. Both the underlying funds and the overall portfolio are compliant with Regulation 28 of the South African Pension Funds Act.

Mandatory disclosures:

1. Funds are valued daily at 15:00. Instructions must reach us before 14:00 (12:00 for Nedgroup Money Market Fund) to ensure same day value. Daily prices are available on request from your relationship manager.
2. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Data source: © 2015 Morningstar.
3. Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs (TC), expressed as a percentage of the Fund, relates to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investments costs of the Fund. Both the TER and TC of the Fund is calculated on an annualised basis, beginning January 2018 and ending December 2020.
