Portfolio profile
The portfolio is suitable for investors seeking exposure to domestic and foreign equity markets, with capital appreciation as their primary goal over the long term. Investors should have a tolerance for short-term volatility in order to achieve long-term objectives. On the 1st September 2020 the fund was allowed to invest up to 30% offshore, prior to this the fund held purely domestic equities.

1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month.

2) Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. They should not be considered in isolation as returns may be impacted by other factors, over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/10/2017 and ending 30/09/2020.
