**FUND INFORMATION**

**RISK PROFILE**

| Risk Level | High | Moderate to High | Moderate | Low to Moderate | Low |

**RECOMMENDED MINIMUM INVESTMENT TERM**

- 1 year
- 3 years
- 5 years

**FUND OBJECTIVE**
The fund is strictly managed in accordance with Shari’ah (Islamic Law) and therefore does not invest in shares of companies whose core business involves dealing in alcohol, gambling, non-halal foodstuffs or interest-bearing instruments. The Shari’ah Supervisory Board oversees adherence to the applicable Shari’ah principles. This fund specifically adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as interpreted by the Shari’ah Supervisory Board.

**WHO IS THIS FUND FOR?**
This fund is suited to investors with a long-term investment horizon seeking to maximise growth in a Shari’ah compliant fund. They are able to accept the risks associated with equity funds and also the mandate risk of a more limited investment universe.

**NON-PERMISSIBLE INCOME**
Incidental income deemed to be non-permissible is paid to the charitable trust elected by the Shari’ah Supervisory Board in line with the principles of Shari’ah and the supplemental deed of the fund. Non-permissible income does not form part of the investor’s income.

**INVESTMENT MANDATE**
The fund is a Shari’ah compliant fund which provides investors with cost-effective access to a broad spectrum of local and international listed investments.

**REGULATION 28 COMPLIANCE**
The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

**BENCHMARK:**
85% Customised SA Shari’ah Equity Index & 15% S&P Developed Markets Large and Mid-Cap Shari’ah Index

**FUND COMMENTARY** AS AT 31/03/2020

Years from now historians will reflect upon 2020. The combination of two black swan events hitting markets in short order has created unparalleled conditions. Markets did not expect a global pandemic to end the longest bull market; nor did they expect the oil price war. Large parts of the world are under “lockdown” as part of the largest stay at home/work from home experiment in history. A global recession is certain as activity comes to a sudden standstill. It’s as if global markets, while reasonably healthy up until its peak, went into cardiac arrest, bringing economic activity to a screeching halt. This caused the fastest market decline in history as investors discounted the new pandemic reality. The viral sell-off, as well as the unfolding global monetary, fiscal and social response to it, is historical.

The global spread of the virus, coupled with uncertainty about when the rate of new cases will slow, has caused volatility to spike. Market peaks and downturns are only known with hindsight. In real time, it’s impossible to predict when markets will bottom considering all the unknowns. This bear market may last several months. Even if the bear market resolves faster than expected, investors should be prepared for volatility as the number of infections increases and the economic toll becomes clearer. Given this backdrop, what should investors focus on? We believe investors should focus on the growth rate of new infections.

Chinese equities troughed around the time when the growth rate of new cases fell for several days, confirming that the spread of new infections was slowing, hence our view that global equities may bottom when infections slow.

Investors tend to run away when assets are on sale and shrink their time horizons. When prices are high investors pile into shares and when prices are low such as now, demand is weak and sentiment is bleak. Going into the crisis, our portfolios had higher than average cash balances. These cash balances have been slowly deployed into “recession-proof/ anti-viral” low volatility shares such as Natcore, Adcock and gold. Slow deployment of cash is important as we want to benefit from falling markets by employing rand cost averaging – this is akin to micro dosing over time. We have re-examined the balance sheets of all our holdings to ensure that the balance sheets can weather the recession and tighter credit conditions. Given this, we have not added to our new position in Sasol given the likely capital raise. We are embracing the sell-off by adding to or buying high quality businesses currently on a “less 50%” sale.

Amid the gloom, it’s tempting for investors to succumb to fear. The market’s propensity for optimism tends to overshoot in good times and, equally, its pessimism tends to overshoot in bad times. We are in a World War against Covid-19. We are hopeful that the deeply rooted human incentive to survive will help us collectively to navigate the pandemic. Like other crises before it, this too shall pass.

**OTHER INVESTMENT CONSIDERATIONS**

**MINIMUM INVESTMENTS:**
- Monthly: R500 - Lump sum: R10 000 - Ad hoc: R500

**INITIAL CHARGES (Excl. VAT):**
There is no initial administration charge for investment transactions of R500 and above. Initial adviser fee will be between 0% and 3.45%. Investment transactions below the R500 fund minimum incur a 2.30% administration charge.

*Please note: Initial charges do not apply to the Class B funds.

**ONGOING**

<table>
<thead>
<tr>
<th>Total Expenses (Incl. Annual Service Fee) (31/12/2019)</th>
<th>Class A</th>
<th>Class B1*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Expense Ratio (TER) Incl. VAT</td>
<td>1.76%</td>
<td>1.51%</td>
</tr>
<tr>
<td>Transaction Cost (TC)</td>
<td>0.22%</td>
<td>0.22%</td>
</tr>
<tr>
<td>Total Investment Charge</td>
<td>1.98%</td>
<td>1.53%</td>
</tr>
</tbody>
</table>

*Please note: The Class B1 fund is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund’s value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

**INVEST WITH FAITH**

OLD MUTUAL ALBARAKA EQUITY FUND  
MARCH 2020

**We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.**

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should really see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 15:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, which may vary from fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund’s assets plus income minus expenses (NAV) of the portfolio divided by the number of units on issue.
- This fund holds investments in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. Performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performance may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 March 2020.
