FUND OBJECTIVE

The fund aims to offer investors an ethical investment vehicle providing income and relative capital stability over time. Income will be provided to clients through investment in Shari'ah compliant short- and longer-term SA and global non-equity securities.

The Shari'ah Supervisory board oversees adherence to the applicable Shari'ah principles. This fund specifically adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as guided by the Shari'ah Supervisory Board.

WHO IS THIS FUND FOR?

This fund is for investors wanting capital stability from underlying Shari'ah investments, as well as income which will be provided to clients through Shari'ah compliant short-term and long-term local and offshore securities.

NON-PERMISSIBLE INCOME

Incidental income deemed to be non-permissible is paid to the charitable trust elected by the Shari'ah Supervisory Board in line with the principles of Shari'ah. Non-permissible income does not form part of the investor's income.

INVESTMENT MANDATE

The fund is a Shari'ah compliant multi-asset income fund that offers investors access to local and international asset classes including equity, liquid assets and non-equity securities, such as sukuks (Islamic bonds) and equity conduits. It may also invest in the portfolios of other unit trusts, both locally and those registered in countries with acceptable regulatory environments. This fund may have a maximum effective equity exposure (including international equity) of 10% and a maximum effective property exposure (including international property) of 25% of the market value of the portfolio. The fund will have a combined exposure minimum of 7.5% of net asset value to listed equity and listed property securities.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

Relative to the end of 2024, the first quarter of 2025 marked a significant reversal of market expectations, as trade tensions dominated market sentiment after the Trump administration implemented wide-ranging tariffs targeting China, which extended to the US' traditional allies. US markets struggled, with the S&P 500 falling 4.6% and NASDAQ declining 10.4% in dollars, its worst start since 2018. US economic data showed cooling trends, with the Atlanta Fed GDPNow projecting a US real GDP quarter one contraction of 2.8% at the end of March. In contrast, European and Chinese markets showed strength, with Europe and China up 10.7% and 15.0% (in dollars) year-to-date, respectively. Fiscal stimulus emerged as a surprise catalyst for European markets, as Germany announced a €500 billion infrastructure fund and increased defence spending, breaking previous fiscal rules. China also implemented stimulus, including wage increases for government workers and expanded consumer programmes. Noteworthy was that emerging markets outperformed developed markets for the first time since 2017, with the quarterly return of MSCI EM of +2.4% outpacing that of MSCI World, which delivered -2.1% (in US dollars). Volatility in the global tech sector intensified when Chinese AI startup DeepSeek released its cost-effective language model, triggering concerns about AI pricing. NVIDIA shares plunged approximately 20%, spreading weakness across the semiconductor sector. Commodities emerged as top performers over the quarter, with gold breaking through

US\$3 000 to reach historic highs (+19% year-to-date). Copper gained 25% in quarter one, while Brent crude rose to US\$77.2/bbl. The US dollar weakened significantly with DXY down 3.2% in March, as the euro strengthened 4.3% on fiscal stimulus announcements. Domestically, the key policy news was that the budget failed to receive a GNU consensus, with the ANC and DA continuing to negotiate to reach a deal. In March, the MPC kept the key policy rate at 7.5%, as expected. However, the tone of the meeting was more balanced compared to its hawkish view in January. In terms of domestic market performance, South African equities outperformed all asset classes with a total return of +5.9% year-to-date (in rands). Resources (+27.9%) significantly outperformed industrials, which returned +3.1%, while South African financials recorded a loss of 2%. Within resources, precious metals showed exceptional gains (+58.5% year-to-date), with companies like Harmony (+77%), Gold Fields (+67%), AngloGold (+67%) and Implats (+43%) delivering outstanding returns. South African equity laggards included energy (-13.9%), followed by consumer discretionary (-9.9%) and industrials (-8.3%). South African bonds only managed to eke out a total return of +0.7%, while property lost 3.5% over the quarter. Against the backdrop mentioned above, the exposure to both global and local equities detracted from performance ending March 2025. While equity markets were in turmoil and delivered negative returns across domestic and international markets,

the fund has almost 90% in Sukuk, which delivered a positive 1.59% (gross) for the quarter, while the benchmark (STEFI) returned 1.89%. Within equity, local equities remain the largest allocation, with a natural bias to small- and mid-caps, which should benefit from, rate cuts and improved growth. While equity is a small component, having a quality factor bias brings stability and can help the fund to extend gains above Sukuk (Islamic fixed-income instruments) returns over the long term. Within the allowable Shari'ah universe, there was no forced selling of shares that breached Shari'ah-compliant rules over the quarter ending March 2025. The fund's asset allocation currently comprises roughly 1% in property, 3% in global equity, 7% in local equity, and the balance in Sukuk. The Sukuk calve-out has an 8% yield to maturity with a duration of just over two years. In the current environment, we continue to lock in yields, which requires buying longer-duration Sukuk, and are constantly on the lookout for high-quality characteristics within our equity opportunity set. Our inhouse Macro-Economic indicators hover within 'Slowdown' territory due to the recent PMI print; therefore, we remain cautious about global growth. We have mentioned previously that the sky-high optimism regarding US exceptionalism warrants caution and, moreover, a quality portfolio. The portfolio's large allocation to Sukuk, which is a less risky asset class and should hold up well in an environment of higher volatility and uncertainty.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	0.60%	0.50%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.
The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms..

Total Expenses (Incl. Annual Service Fee) (31/12/2024)	36 Months		12 Months	
	Class A	Class B1	Class A	Class B1
Total Expense Ratio (TER) Incl. VAT	0.70%	0.59%	0.71%	0.59%
Transaction Cost (TC)	-	-	0.01%	0.01%
Total Investment Charge	0.70%	0.59%	0.72%	0.60%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.
TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

INVEST WITH FAITH

OLD MUTUAL ALBARAKA INCOME FUND

MINIMUM INVESTMENTS

Monthly: R500

Lump sum: R10 000

Ad hoc: R500 (in addition to your monthly or lump sum investment)

LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R30 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the [link for a full disclosure](#) on how the Low Balance Charge will apply to your investments.

* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

INITIAL CHARGES (Excl. VAT):

Initial adviser fee will be between 0% and 3.00%.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- Income funds derive their income primarily from interest-bearing instruments as defined. The yield is a current yield and is calculated daily.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 April 2025. Source: Morningstar.

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002. Old Mutual is a member of the Association for Savings and Investment South Africa (ASISA).
