

OLD MUTUAL DYNAMIC FLOOR FUND

FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund strives for long-term capital growth as well as some level of capital protection. Through the use of a quantitative risk model, the fund aims to profit from a rising share market and protect against capital losses in a weak market.

WHO IS THIS FUND FOR?

This fund is suited to investors who strive for long-term capital growth as well as some level of capital protection.

INVESTMENT MANDATE

The fund invests across shares, bonds and cash and may gain exposure to foreign assets up to a maximum of 30% of its portfolio (with an additional 10% for African ex-SA investments) – moving from shares into fixed interest investments when the fund's value drops below a predetermined "floor". When markets start to move up, the fund increases its holdings in shares, tapping into these growth opportunities. Derivatives may also be tactically used to manage and limit downside risk and to capture or lock in gains as and when they occur.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

BENCHMARK: CPI

PERFORMANCE TARGET: CPI + 3% to 4% p.a. (net of fees)
Performance is targeted over the recommended minimum investment term and is not guaranteed.

RISK OBJECTIVE: The fund aims to protect at least 90% of the net investment over a 12-month period.

ASISA CATEGORY: South African – Multi-Asset – Medium Equity

FUND MANAGER(S): Hanno Niehaus & Ziyaad Parker
(Old Mutual Customised Solutions (Pty) Ltd)

FUND COMMENTARY as at 31/12/2018

December was ultimately a poor month for investors globally, as the majority of global equity markets declined while volatility spiked towards the end of the year.

In the USA the S&P 500 Index, which was the star performer for most of 2018, declined sharply to end the month down 9.2%. More than half of offshore equity markets ended down more than 20% and almost all were down more than 10%. The only equity markets globally not in a correction or bear market were Brazil and Nifty 50. Global investors also continued to sell SA equities (R7.9 billion in December), ending the year with a total selling of over R50 billion.

Locally, volatility continued unabated, with dramatic sell-offs being followed by rallies. Although the All Share Index (ALSI) ended the month up 4.25%, it ended the year down 8.53%. In US dollar terms, the SA equity market was one of the worst performers in the world

during 2018. More than half of the shares on the Johannesburg Stock Exchange were down more than 50% off their highs. Listed property continued its poor performance, with the property index ending the year down over 25%. Most multi-asset class investors found 2018 challenging, with nearly all assets returning less than US T-Bills. Two of the few places to find positive returns (apart from US T-Bills) were local cash and government bonds. The GOVI Index ended up 6.9% for the year.

With the US interest rate cycle still in an upward cycle, volatility and gyrations between risk-on and risk-off are likely to continue in 2019.

Given the well-diversified nature of the Old Mutual Dynamic Floor Fund and its moderate exposure to growth assets, the fund will continue to deliver returns in a risk-controlled framework with reduced fund volatility.

Despite the negative return of local equities (-4.9% for the ALSI) and global equities (-1.2% for the MSCI World Index in rands) during the quarter, equity hedging, our bond positioning and currency hedges contributed to the fund limiting losses.

The portfolio is still well positioned to participate in any equity rallies. We do, however, remain cautious and are well placed to protect capital if markets retrace. This approach has served the portfolio well as it continues to provide the optimal blend of exposure to growth assets and capital protection.

OTHER INVESTMENT CONSIDERATIONS

MINIMUM INVESTMENTS:

- Monthly: R500
- Lump sum: R10 000
- Ad hoc: R500

INITIAL CHARGES (Incl. VAT)*:

There is no initial administration charge for investment transactions of R500 and above. Initial adviser fee will be between 0% and 3.45%.

Investment transactions below the R500 fund minimum incur a 2.30% administration charge.

* Please note: Initial charges do not apply to the Class B funds.

ONGOING

	Class A	Class B1*
Annual service fees (excl. VAT)	1.35%	1.00%

* Please note: The Class B1 Fund is only available through investment platforms such as Old Mutual Wealth. The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

TAX REFERENCE NUMBER: 9131/529/15/9

ISIN CODES:	Class A	ZAE000043253
	Class B1	ZAE000043337

Total Expenses (Incl. Annual Service Fee)	36 Months		12 Months	
	Class A	Class B1*	Class A	Class B1*
Total Expense Ratio (TER) Incl. VAT	1.57%	1.17%	1.58%	1.18%
Transaction Cost (TC)	0.07%	0.07%	0.06%	0.06%
Total Investment Charge	1.64%	1.24%	1.64%	1.24%

* Please note: The Class B1 Fund is only available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Funds are also available via Old Mutual Wealth and MAX Investments.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.omut.co.za or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 December 2018.
