FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

ESG FUND RATING

The environmental, social and governance (ESG) fund ratings are based on the exposure of the underlying assets held to industry-specific ESG risks and the ability to manage those risks relative to peers.

FUND OBJECTIVE

The fund aims to offer long-term capital growth through investing in a broad spectrum of South African and international shares.

WHO IS THIS FUND FOR?

This fund is suited to investors seeking long-term capital growth through exposure to a broadly diversified portfolio of South African and international shares. These investors can tolerate South African and international stock market volatility and exchange rate fluctuations.

INVESTMENT MANDATE

The fund invests in shares across all sectors of the South African and international stock market. The exposure to South African shares will focus predominantly on the top 100 shares by market capitalisation as listed on the FTSE/JSE All Share Index (J203). The offshore exposure is limited to 30% of its portfolio (with an additional 10% for African ex-SA investments). The fund aims to achieve its performance objective through well-researched and superior share selection. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

PORTFOLIO MANAGER

- 15 years of investment experience

Over the past year, driven by our research, we had identified the following key themes that would drive the investment returns clients hire us to deliver.

Globally

- **Earnings over ratings:** This means we see a strong but maturing global recovery where returns will be driven increasingly by fundamental earnings rather than a price-earnings (PE) re-rating (which was the key driver from the bottom of the pandemic-induced recession).
- **Regime change:** This means that we are anticipating higher inflation over the medium term. Inflation will be driven by supply chain disruptions, high commodity prices and the record volumes of stimulus that central banks used to drive the recovery.

South Africa

- **Cyclical recovery:** The higher commodity prices have (in the short term) created a terms of trade windfall. A continuing vaccination drive and global recovery will fuel a cyclical recovery in South Africa.
- **Cash is trash:** Low rates will drive return-seeking investors to growth assets and away from cash.

Thus, with the above themes, we positioned and continue to position clients' funds in favour of cyclical/economically sensitive companies. We have positioned the fund towards South Africa, given the compelling valuations relative to emerging and global markets. We have also positioned clients' funds favouring "value" rather than "growth" shares. Earnings per share (EPS) growth in this recovery has not been scarce, so paying a lower price for EPS growth makes sense.

Over the past quarter, our overweight positions in MTN (+36.9%), OMNIA (+31.2%) Sasol (+27.7%) and Old Mutual (+24.6%), including some strong returns

from the big four banks and Investec, contributed meaningfully to the returns. Our underweight position in the Naspers/Prosus complex was also a key contributor to client returns. This particular investment call illustrates the advantage of our multi-faceted investment approach. Naspers is a market darling and a very sizeable position in many portfolios. Market commentators tend to agree that the Naspers/Prosus complex offers compelling fundamental bottom-up value. That's before you add the discount that they trade at relative to their stake in the Chinese tech company Tencent. While we do not materially disagree with the market's view that Tencent is a world-class business that should warrant a very high rating given its market opportunity, that famous Albert Einstein adage needs to be mentioned here: "Not everything that can be counted counts and not everything that counts can be counted."

Our thematic lens into the world raised concerns about the regulation of tech companies. This concern and our cyclical recovery and value > growth theme meant that we had been reducing our stake in Naspers/Prosus at higher valuations, and deploying that in domestically focused, economically sensitive SA Inc companies. This proved to be a highly profitable decision, as the draconian regulatory decisions in China took their toll on the Tencent share price, leading to a substantial underperformance in the companies from their peaks earlier in the year.

Following a substantial price recovery, we have been reducing our platinum group metal and diversified miners holdings. We have continued buying Investec, Discovery, Pepkor and Anheuser-Busch on the back of weakness in the price.

FUND COMMENTARY AS AT 30/09/2021

We apply a pragmatic approach to building and managing equity, property and multi-asset class solutions. We seek to invest in assets that are both attractively priced and experiencing tailwinds to their growth prospects. To do this, we blend top-down and bottom-up research, use quantitative tools and apply our philosophy of theme and price.

Annual service fees (excl. VAT)	1.35%	1.00%	1.00%

* Please note: The Class B1 fund is available through investment platforms such as Old Mutual Wealth.

This fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

Total Expenses (Incl. Annual Service Fee) (30/06/2021)	36 Months			12 Months

* Please note: The Class B1 fund is available through investment platforms such as Old Mutual Wealth.

Please note: The 36-month TER does not have a full 3-year history and is negatively impacted by fixed costs at the inception of the fund. TER is a historic measure and clients are expected to experience a significantly lower fee going forward.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The TER and TC cannot be determined accurately for the funds that are less than one year old. Calculations are based on actual data where possible and best estimates where actual data is not available.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down.
- Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 October 2021.
