FUND OBJECTIVE

The fund aims to provide long-term capital growth by gaining exposure to the FTSE RAFI® All World 3000 Index. This RAFI® Index comprises listed companies rated according to four financial factors: cash flow, sales and dividends (averaged over 5 years) as well as book value at review date.

WHO IS THIS FUND FOR?

This fund suits investors with a longer-term investment horizon who primarily seek capital growth through exposure to the developed and emerging market equities that make up the FTSE RAFI® All World 3000 Index. These investors do not require income from this investment, and can tolerate stock market and currency volatility.

INVESTMENT MANDATE

Apart from assets in liquid form, the fund holds participatory interests in only one collective investment scheme, namely the Old Mutual FTSE RAFI® All World Index Fund, which aims to replicate the performance of the FTSE RAFI® All World 3000 Index. The Old Mutual FTSE RAFI® All World Index Fund holds predominantly equity, but may also hold non-equity securities. Derivatives can be used to enable the portfolio to more effectively track the index.

REGULATION 28 COMPLIANCE

The fund aims to offer exposure to a specific asset class. It holds a higher allocation to both international assets and equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

The first quarter of 2025 was a period of significant economic uncertainty and rising geopolitical tension and turbulence. The release of China-based DeepSeek sent shockwaves through the US market, while the Trump administration imposed massive tariffs on its global trade partners. Gold reached an all-time high in March as investors rushed to safe-haven assets amid ongoing trade wars and fears of economic slowdown.

The US pulled back during quarter one, posting its worst quarter since 2022. Meanwhile, European equity markets surged ahead during the period, outshining their developed market rivals. Relatively cheaper valuations and a potential surge in defence spending has contributed to a rally in European shares over the past three months.

Asian markets saw dispersion in various markets over the first three months. Chinese stocks outperformed, while Indian and Japanese equities declined. Emerging markets performed solidly; however, the region faces headwinds due to heightened trade tensions and capital outflows.

South African equity markets recorded a robust quarter one, with the FTSE/JSE ALSI rising 5.9%. Resources rebounded strongly in the first three months of the year, surging 28%, driven primarily by gold producers. The FTSE/JSE SA Listed Property Index lost 3.5%, while the All-Bond Index inched 0.7% higher.

The rand weakened over the period amid concerns of the effect of tariffs imposed by the US. Meanwhile, the two biggest parties of the coalition government (the ANC and DA) continue their disagreement regarding the state of the national budget.

The FTSE RAFI® All World 3000 Index had a positive return of 4.46% for the quarter to March 2025, outperforming the MSCI All Country World Index by 5.8%. Over a 12-month period, the FTSE RAFI® All World 3000 Index returned 8.3%, while MSCI All Country World Index rose 7.15%.

On a country level, New Zealand (-14.2%) was the largest detractor of the FTSE RAFI® All World 3000 Index during the period, followed by Turkey

(-13.8%). The largest contributors to return were Poland (26.5%) and Spain (27.7%). On a sector level, technology and consumer discretionary detracted 8.1% and 2.6% respectively. Telecoms (12.0%) and consumer staples (10.8%) contributed positively to returns.

The fund tracks the FTSE RAFI® All World 3000 Index and aims to replicate the return of the underlying index.

The FTSE RAFI® All World 3000 Index offers exposure to both developed and emerging markets globally, by selecting and weighting the largest 3000 companies according to their fundamentals of dividends, cash flows, sales and book value, as opposed to market capitalisation.

RAFI has a fundamental price indifferent, contra-trading approach, which looks to overweight under-valued stocks and underweight over-valued stocks.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	0.70%	0.45%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

Total Expenses (Incl. Annual Service Fee) (31/03/2025)	36 Months		12 Months	
	Class A	Class B1	Class A	Class B1
Total Expense Ratio (TER) Incl. VAT	1.33%	1.04%	1.31%	1.03%
Transaction Cost (TC)	-	-	-	-
Total Investment Charge	1.33%	1.04%	1.31%	1.03%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- A feeder fund is a portfolio that invests in a single fund which levies its own charges. This could result in a higher fee structure for the feeder fund.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 March 2025.
