

OLD MUTUAL GOLD FUND

FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund aims to offer superior returns over the medium to longer term through investment in the shares of companies involved in gold and other precious metals.

WHO IS THIS FUND FOR?

This fund is suited to investors seeking capital growth over the long term, who have a particular view of gold and other precious metals and who can tolerate stock market and sector volatility.

INVESTMENT MANDATE

It invests in gold and other precious metals showing above average prospects for growth. No SA and offshore exposure limits will apply. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and may hold a higher exposure to equities and offshore assets and a greater exposure to a single equity than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

OLD MUTUAL GOLD FUND

FUND MANAGER INFORMATION

MERYL PICK

PORTFOLIO MANAGER

- BScEng (Chem), MBA
- 6 years of investment experience

FUND COMMENTARY as at 31/12/2018

The gold price closed the quarter at US\$1 279 per ounce, having risen nearly 8% over the final quarter of 2018 – bringing it close to the 2017 year-end level of US\$1 291 per ounce. The gold price faced headwinds throughout the year, particularly from a strengthening US dollar, which has been firming as the US economy continues to strengthen relative to other developed markets. The most recent US Federal Reserve (Fed) interest rate hike went against market expectations. Going into the end of 2018, fears abound that Fed policy will stifle US growth and potentially trigger the next recession. Amidst this uncertainty, gold has found support. Ongoing trade talks between the US and China, as well as Brexit negotiations, may contribute to maintaining a heightened level of uncertainty, which should further support gold. Physical demand for jewellery, coins and bars will provide a price floor at lower prices. The COMEX market for gold futures contracts

has tipped back into a net long position, but remains significantly below long-term average levels – reflecting weak investment demand. Over the longer term, this should prove to be a bullish signal for the gold price.

The Old Mutual Gold Fund has a composite benchmark weighted 70% to the FTSE/JSE Gold Mining Index and 30% to the FTSE Gold Mines Index, which is comprised of global gold stocks. The FTSE/JSE Gold Mining Index rose 38% over the quarter, recovering much of the ground lost over the course of 2018. The index rose 6% over the full year. Over the last quarter, the FTSE Gold Mines Index rose by 18% in rand terms. However, across the full year it was up only 3%.

AngloGold Ashanti was the strongest performer on the local front this past quarter and over the full year. AngloGold has been the fund's largest holding for some time. On the international front, the relative outperformers

were Acacia Mining over the fourth quarter and Australian producer Northern Star Resources over the full year.

Sibanye-Stillwater and Gold Fields endured strike action at their South African assets, which will likely negatively impact their fourth-quarter operational performances.

AngloGold Ashanti remains the fund's largest holding followed by Gold Fields. AngloGold has a globally diverse portfolio of assets with brownfields and greenfields expansion opportunities. I expect the new CEO to maintain focus on reducing costs while revisiting the investment case for each asset in the portfolio. The international background of the new CEO highlights that AngloGold's future focus is on its ex-South Africa assets. Under new leadership it is even more likely that value will be unlocked by the unbundling or disposal of the remaining South African assets.

OTHER INVESTMENT CONSIDERATIONS

MINIMUM INVESTMENTS:

- Monthly: R500
- Lump sum: R10 000
- Ad hoc: R500

INITIAL CHARGES (Incl. VAT):

There is no initial administration charge for investment transactions of R500 and above. Initial adviser fee will be between 0% and 3.45%.

Investment transactions below the R500 fund minimum incur a 2.30% administration charge.

ONGOING

	Class A	Class B1	Class R
Annual service fees (excl. VAT)	1.50%	1.10%	1.00%

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

TAX REFERENCE NUMBER: 9000/032/60/8

ISIN CODES:	Class A	ZAE000097457
	Class R	ZAE000020814

Total Expenses (Incl. Annual Service Fee)	36 Months			12 Months		
	Class A	Class B1	Class R	Class A	Class B1	Class R
Total Expense Ratio (TER) Incl. VAT	1.76%	1.25%	1.19%	1.78%	1.32%	1.20%
Transaction Cost (TC)	0.39%	0.35%	0.39%	0.37%	0.37%	0.37%
Total Investment Charge	2.15%	1.60%	1.58%	2.15%	1.69%	1.57%

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.omut.co.za or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- Specialist equity funds may hold a greater risk as exposure limits to a single security may be higher.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 December 2018.
