Class B1	OAMB1	ZAE000199139

FUND OBJECTIVE

The fund aims to achieve steady growth of capital and a higher return than the average general equity fund. It is managed using a proprietary quantitative investment process.

WHO IS THIS FUND FOR?

This fund is suited to investors with a long-term investment horizon seeking to maximise growth and who are able to accept the risks associated with equity funds.

INVESTMENT MANDATE

The fund invests in equities listed on the JSE Securities Exchange (JSE). Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

REZA FAKIE

- BBusSc (Actuarial Science): Quantitative Science, CFA® Charterholder
- 15 years of investment experience

Relative to the end of 2024, the first quarter of 2025 marked a significant reversal of market expectations, as trade tensions dominated market sentiment after the Trump administration implemented wide-ranging tariffs targeting China, which extended to the US' traditional allies. US markets struggled, with the S&P 500 falling 4.6% and NASDAQ declining 10.4% in dollars, its worst start since 2018. US economic data showed cooling trends, with the Atlanta Fed GDPNow projecting a US real GDP quarter one contraction of 2.8% at the end of March.

In contrast, European and Chinese markets showed strength, with Europe and China up 10.7% and 15.0% (in dollars) year-to-date, respectively. Fiscal stimulus emerged as a surprise catalyst for European markets, as Germany announced a €500 billion infrastructure fund and increased defence spending, breaking previous fiscal rules. China also implemented stimulus, including wage increases for government workers and expanded consumer programmes. Noteworthy was that emerging markets outperformed developed markets for the first time since 2017, with the quarterly return of MSCI EM of +2.4% outpacing that of MSCI World, which delivered -2.1% (in US dollars).

Volatility in the global tech sector intensified when Chinese AI startup DeepSeek released its cost-effective language model, triggering concerns about AI pricing. NVIDIA shares plunged approximately 20%, spreading weakness across the semiconductor sector.

Commodities emerged as top performers over the quarter, with gold breaking through US\$3 000 to reach historic highs (+19% year-to-date). Copper gained 25% in quarter one, while Brent crude rose to US\$77.2/bbl. The US dollar weakened significantly with DXY down 3.2% in March, as the euro strengthened 4.3% on fiscal stimulus announcements.

Domestically, the key policy news was that the budget failed to receive a GNU consensus, with the ANC and DA continuing to negotiate to reach a deal. In March, the MPC kept the key policy rate at 7.5%, as expected. However, the tone of the meeting was more balanced compared to its hawkish view in January.

In terms of domestic market performance, South African equities outperformed all asset classes with a total return of +5.9% year-to-date (in rands). Resources (+27.9%) significantly outperformed industrials, which returned +3.1%, while South African financials recorded a loss of 2%. Within resources, precious metals showed

exceptional gains (+58.5% year-to-date), with companies like Harmony (+77%), Gold Fields (+67%), AngloGold (+67%) and Implats (+43%) delivering outstanding returns. South African equity laggards included energy (-13.9%), followed by consumer discretionary (-9.9%) and industrials (-8.3%). South African bonds only managed to eke out a total return of +0.7%, while property lost 3.5% over the quarter.

The largest contributors, on a sector basis, was from materials. The fund saw a significant detraction from its underweight position in the sector, however, this was offset from the stock selection within materials. The fund also saw a significant contribution from consumer discretionary. The fund saw a small detraction from its overweight position to the sector however, this was offset from stock selection in the sector. The fund saw a detraction both from its underweight position to communication services, as well as from its selection within the sector.

The current position of the portfolio is to gain from shares, which have a lower-than-average value exposure, as well as to gain from shares, which have a higher-than-average momentum exposure.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	1.35%	1.00%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

Total Expenses (Incl. Annual Service Fee) (31/03/2025)	36 Months		12 Months	
	Class A	Class B1	Class A	Class B1
Total Expense Ratio (TER) Incl. VAT	1.58%	1.18%	1.57%	1.17%
Transaction Cost (TC)	0.23%	0.23%	0.19%	0.19%
Total Investment Charge	1.81%	1.41%	1.76%	1.36%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The TER and TC cannot be determined accurately for the funds that are less than one year old. Calculations are based on actual data where possible and best estimates where actual data is not available.

OLD MUTUAL MANAGED ALPHA EQUITY FUND

MINIMUM INVESTMENTS

Monthly: R500
Lump sum: R10 000
Ad hoc: R500 (in addition to your monthly or lump sum investment)

LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R30 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the [link for a full disclosure](#) on how the Low Balance Charge will apply to your investments.

* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

INITIAL CHARGES (Excl. VAT):

Initial adviser fee will be between 0% and 3.00%.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 March 2025. Source: Morningstar.

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002. Old Mutual is a member of the Association for Savings and Investment South Africa (ASISA). Old Mutual Unit Trust Managers has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.

Trustee: Standard Bank, PO Box 54, Cape Town 8000. Tel: +27 21 401 2002, Fax: +27 21 401 3887
