<b>Class A</b>	OMMF	ZAE000020749
<b>Class B1</b>	OMMB3	ZAE000148581
<b>Class A2</b>	OLMM	ZAE000135802

### FUND OBJECTIVE

The fund aims to deliver a regular income and to outperform bank deposits over time, while preserving capital. The fund has never experienced a negative return over any calendar month since inception.

### WHO IS THIS FUND FOR?

This fund is suited to investors who want a liquid investment that delivers a regular income and/or maximum capital protection, but who understand that their investment is unlikely to keep pace with inflation if held in the long term.

### INVESTMENT MANDATE

The fund invests in money market securities with a maturity of less than 13 months. The fund's weighted average duration may not exceed 90 days.

The fund has a Global Credit Rating (GCR) of AA+. The next review date is 30 June 2025.

### REGULATION 28 COMPLIANCE

The fund is not required to be Regulation 28 compliant in terms of its Deed, but the fund manager is mandated to comply with Regulation 28 on a day-to-day basis.

# OLD MUTUAL MONEY MARKET FUND

## PORTFOLIO MANAGERS COMMENTARY AS AT 31/03/2025

FUTUREGROWTH ASSET MANAGEMENT

**NADIA ISMAIL**

- BCom (Hons)
- 20 years of investment experience

The US Federal Reserve (Fed) held two FOMC meetings in the first quarter of 2025. In the 29 January meeting, the Fed unanimously resolved to keep interest rates on hold and continue to reduce its securities holdings, with economic activity remaining robust and unemployment levels remaining low. In its three previous meetings, the Fed had implemented three policy rate cuts of 25bps each, this therefore marked a pause in the monetary policy easing cycle. In the 19 March meeting, the Fed unanimously voted to keep the policy rate on hold and slow the pace of balance sheet run-off, with labour market conditions remaining robust, and inflation levels remaining contained. Trump administration policies such as tariffs and resultant inherent recession and inflationary risks were highlighted as an area of economic concern looking ahead.

In the 30 January MPC meeting, the South African Reserve Bank (SARB) announced a reduction in the repurchase rate by 25bps from 7.75% to 7.5%, with headline inflation cited as well contained in the immediate term. At

this point in time, the inflation print was at 3%, which is well below the midpoint (4.5%) of the inflation target band. The SARB noted that risk to the inflation outlook was to the upside, while risks to the growth forecast remained balanced at the time. The MPC voting split at this meeting was four members voting for a cut, while two members voted for rates to remain unchanged. Fast-forward to the 20 March MPC meeting, it again decided to keep the repurchase rate at 7.5%, with headline inflation still relatively well contained at the time and printing at 3.2%. This pause in the rates' cutting cycle was influenced by a highly uncertain global economic environment, led by the Trump administration 'America first' policies. Both local growth and inflation forecasts were revised marginally lower in the immediate term, with risks to the downside and upside, respectively.

The 12-month JIBAR rate marginally decreased over the period, ending the quarter at 8.092% after opening the quarter at 8.125%. Relative to this, 3-month Jibar decreased from 7.75% at the beginning of the quarter to 7.558%

at the end of the quarter. This Jibar curve flattening is in line with the local forward rate curve flattening, signalling a shallow interest rate cutting cycle during 2025. The treasury bill and bank NCD curves remained flat, with limited term premium for investing in the longer end of those curves. Short term funding requirements from local banks remain subdued, with 1-year Jibar-linked NCD's offered at 40bps above Jibar by the local big four banks.

The Futuregrowth interest rate team macroeconomic view is that South Africa has transitioned away from the top of the inflation and interest rate cycles, with the cutting cycle having commenced in quarter three of 2024. This cutting cycle has now paused and forecasted to be shallow in 2025 if resumed. This current pause is a function of a very uncertain global economic and geopolitical backdrop, adding increased volatility to markets. Portfolio risk positioning therefore remains neutral to benchmark, with exposure to term credit remaining a key avenue for yield enhancement.

## OTHER INVESTMENT CONSIDERATIONS

### ONGOING

	Class A	Class A2	Class B1
Annual service fees (excl. VAT**)	0.50%	0.40%	0.25%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

Class A2 is closed to new business.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

Total Expenses (Incl. Annual Service Fee) (31/03/2025)	36 Months			12 Months		
	Class A	Class A2	Class B1	Class A	Class A2	Class B1
Total Expense Ratio (TER) Incl. VAT	0.59%	0.47%	0.30%	0.59%	0.47%	0.30%
Transaction Cost (TC)	-	-	-	-	-	-
Total Investment Charge	0.59%	0.47%	0.30%	0.59%	0.47%	0.30%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

Class A2 is closed to new business.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

# OLD MUTUAL MONEY MARKET FUND

## MINIMUM INVESTMENTS

Monthly: R500  
Lump sum: R10 000  
Ad hoc: R500 (in addition to your monthly or lump sum investment)

### LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge\* of R30 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the [link for a full disclosure](#) on how the Low Balance Charge will apply to your investments.

\* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

### INITIAL CHARGES (Excl. VAT):

Initial adviser fee will be between 0% and 3.00%.

## DISCLOSURES

**We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.**

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at [www.oldmutualinvest.com](http://www.oldmutualinvest.com) or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- A money market fund is not a bank deposit account. Its unit price aims to be constant but investment capital is not guaranteed. The total return is primarily made up of interest (declared daily at 13:00) but may also include any gain/loss on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses, it can have the effect of reducing the capital value of the fund. The published yield is calculated using the average of the fund's previous seven days' net income (and assumes all income was reinvested). This figure is then annualised, which is the weighted average compound growth rate. Excessive withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 May 2025. Source: Morningstar.

Futuregrowth Asset Management (Pty) Ltd is a Licensed Financial Services Provider.

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002.
