

OLD MUTUAL RAFI® 40 INDEX FUND

FUND INFORMATION

RISK PROFILE

RECOMMENDED INVESTMENT TERM

BENCHMARK*:

FTSE/JSE RAFI® 40 Index, gross of fees

* The FTSE/JSE aligned the index construction methodology of the FTSE/JSE RAFI40 Index with the index calculation methodology of the Shareholder Weighted 40 Index (SWIX 40 Index). This resulted in a reweighting of the underlying holdings in the FTSE/JSE RAFI40 Index, effective from 31 March 2024. Apart from the re-weighting of index exposures, there is no change to how this index fund is managed.

FUND OBJECTIVE

The fund aims to generate a return in line with the FTSE/JSE RAFI® 40 Index. Its primary objective is to provide long-term capital growth, with a secondary objective of delivering a reasonable income over time.

WHO IS THIS FUND FOR?

This fund is suited to investors who want to grow capital over the long term by tracking the FTSE/JSE RAFI® 40 Index. The investor can tolerate stock market volatility.

INVESTMENT MANDATE

The fund invests in shares included in the FTSE/JSE RAFI® 40 Index, tracking the weightings of each company as closely as possible. This RAFI® Index comprises listed companies rated according to four financial factors: cash flow, sales and dividends (averaged over 5 years) as well as book value at review date. Derivatives can be used to enable the portfolio to more effectively track the RAFI®.

REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

South African assets performed well over the past three months, finding support from a more constructive global environment. The FTSE/JSE All-Share Index rose 10.2% over the quarter, bringing its year-to-date return to 16.7%. The FTSE/JSE SA Listed Property Index rose 9.1%, while the FTSE/JSE All-Bond Index gained 5.9%.

The National Budget was finalised in May after a proposed Value-Added Tax hike caused an intense showdown among members of the GNU. Local inflation remains under control, with the latest data showing a year-on-year change of 2.8% for May.

The FTSE/JSE RAFI® 40 Index outperformed the FTSE/JSE Top 40 Index for the quarter ending June 2025. The RAFI 40 Index returned 11.83% relative to the 10.32% performance of the market-capitalisation weighted Top 40 Index.

Key contributors to the index's performance were Sibanye Stillwater, Northam Platinum Holdings and Reinet Investments, returns of 54.9%, 46.4% and 29.4% respectively. Key detractors from index's performance were Aspen Pharmacare Holdings, Anglo American plc and Kumba Iron Ore with returns of -27.0%, -9.4% and -8.7% respectively.

At the June 2025 FTSE/JSE index rebalance, there were no constituent additions and deletions to the index.

The fund tracks the FTSE/JSE RAFI® 40 Index, and its shareholdings mirror the shares that make up this benchmark.

In contrast to market capitalisation-weighted indices, this index's composition reflects the underlying companies' economic footprint, using fundamental measures to determine weightings. The index data is supplied by

Research Affiliates® and is based on historic sales, cash flow, dividends paid and book value. As a fundamentally weighted index, the RAFI methodology favours stocks with a value bias.

Cash exposure in the fund is kept to a minimum to give investors the full benefit of being invested in equities. Derivatives are used primarily for efficient portfolio management purposes, minimise trading costs and increase liquidity. The primary holdings of the fund are physical equity, ensuring that the performance of the fund is in line with its benchmark.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	0.75%	0.50%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

Total Expenses (Incl. Annual Service Fee) (31/03/2025)	36 Months		12 Months	
	Class A	Class B1	Class A	Class B1
Total Expense Ratio (TER) Incl. VAT	0.89%	0.60%	0.88%	0.60%
Transaction Cost (TC)	0.09%	0.09%	0.07%	0.07%
Total Investment Charge	0.98%	0.69%	0.95%	0.67%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Multi-Managed Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 June 2025. Source: Morningstar.
