FUND INFORMATION

RISK PROFILE

RECOMMENDED INVESTMENT TERM

BENCHMARK*:

FTSE/JSE Top 40 Index

* The FTSE/JSE aligned the index construction methodology of the FTSE/JSE Top40 Index with the index calculation methodology of the Shareholder Weighted 40 Index (SWIX 40 Index). This resulted in a re-weighting of the underlying holdings in the FTSE/JSE Top40 Index, effective from 31 March 2024. Apart from the re-weighting of index exposures, there is no change to how this index fund is managed.

FUND OBJECTIVE

The fund aims to provide long-term capital growth by tracking the performance of the top 40 companies listed on the JSE Securities Exchange (JSE).

WHO IS THIS FUND FOR?

This fund is suitable for investors who want to grow capital over the long term by tracking the FTSE/JSE Top 40 Index. The investor can tolerate stock market volatility.

INVESTMENT MANDATE

The fund tracks the FTSE/JSE Top 40 Index as closely as possible and invests in shares included in the index. The portfolio is tailored to match the performance of the FTSE/JSE Top 40 Index, but other securities will be held to offset high inflows and index fluctuations. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

South African equity markets recorded a robust quarter one, with the FTSE/JSE ALSI rising 5.9%. Resources rebounded strongly in the first three months of the year, surging 28%, driven primarily by gold producers. The FTSE/JSE SA Listed Property Index lost 3.5%, while the All-Bond Index inched 0.7% higher.

The rand weakened over the period amid concerns of the effect of tariffs imposed by the US. Meanwhile, the two biggest parties of the coalition government (the ANC and DA) continue their disagreement regarding the state of the national budget.

The FTSE/JSE Top 40 Index recorded a gain of 8.49% for the quarter and ended the year with a return of 22.83%. Sector returns were mixed for the quarter with basic materials recording the strongest gain at 29.95%. Energy (-13.89%) and consumer services (-9.94%) lagged all other sectors.

Among the top performing shares for the quarter were Harmony Gold Mining Co Ltd, Gold Fields Ltd and AngloGold Ashanti Plc with returns of 76.9%, 64.1% and 63.1%, respectively. The worst performing shares were Mr Price Ltd, Glencore Plc and Woolworths Ltd with returns of -24.9%, -19.4% and -18.2%, respectively.

At the March 2025 FTSE/JSE Index review, there was one constituent addition and one constituent deletion to the index and the two-way turnover on the index was 3.28%.

The fund tracks the FTSE/JSE Top 40 Index, and its shareholdings replicate the constituents that make up this benchmark.

Cash exposure is kept to a minimum to give investors the full benefit of being invested in equities. Derivatives are used primarily for efficient portfolio management purposes; to minimise trading costs and increase liquidity.

The primary holdings of the fund are physical equity, ensuring that the performance of the fund is in line with its benchmark.

Long term investors select this fund because they are looking for performance aligned with the large cap component of the market and are cost conscious. Investors seeking consistent beta exposure can allocate capital to and use this fund in their core portfolio strategy.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	0.60%	0.35%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

Total Expenses (Incl. Annual Service Fee) (31/03/2025)	36 Months		12 Months	
	Class A	Class B1	Class A	Class B1
Total Expense Ratio (TER) Incl. VAT	0.72%	0.43%	0.71%	0.43%
Transaction Cost (TC)	0.06%	0.06%	0.02%	0.02%
Total Investment Charge	0.78%	0.49%	0.73%	0.45%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The TER and TC cannot be determined accurately for the funds that are less than one year old. Calculations are based on actual data where possible and best estimates where actual data is not available.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 March 2025. Source: Morningstar.
