**RISK DISCLOSURE**

This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long term investment returns could therefore be higher than a medium risk portfolio.

**ANNUAL SERVICE CHARGE**

The current annual management fee is 1.15% p.a. (Incl. VAT).

**PERFORMANCE FEE**

Performance fees are not levied on the portfolio.

**FAIS CONFLICT OF INTEREST DISCLOSURE**

The portfolio’s TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LIS rebates, if applicable. The portfolio’s performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instance portfolios invest in other portfolios which forms part of the BCI Schemes. These investments will be detailed in this document, as applicable.

**TRANSACTION COSTS (TC)**

TC is the percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying to the portfolio. Transaction costs are a necessary cost in administering the Fund and impacts returns. **TOTAL INVESTMENT CHARGE (TIC)**

TIC is the percentage of the portfolio that was incurred as costs relating to the investment of the portfolio. It is the sum of the total expense ratio (TER) and transaction costs (TC), including VAT.

**TOTAL EXPENSE RATIO (TER)**

TER is the percentage of the value of the portfolio that was incurred as expenses to the administration (charges, levies and fees ) of the portfolio. TER is calculated over a rolling three-year period (or since inception, where applicable) and annualised to the most recent calendar quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs.
