

PRESCIENT EQUITY FUND (A2)

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund aims to achieve returns above the FTSE/JSE Capped Shareholder Weighted Total Return Index (Capped SWIX). The equity selection is done purely on a bottom-up basis and risk is actively managed in the portfolio construction process to eliminate undue stock specific risk.

INVESTMENT PROCESS

The Fund uses quantitative techniques (multi-factor model) to build an active equity portfolio. The selection process targets those shares that offer the best economic value according to predefined income statement, cash flow statement and balance sheet matrices. The quantitative process maintains some positive index type characteristics, such as low turnover and thus lower cost and high liquidity.

WHO SHOULD INVEST

Investors seeking broad based exposure to the South African equity market. This Fund is appropriate for investors with a long-term investment horizon.

RISK INDICATOR DEFINITION

These portfolios typically hold meaningful equity and/or offshore exposure which may result in significant capital volatility over all periods. Due to their nature expected long term returns are higher than for the other risk categories.

RISK INDICATOR

ANNUALISED PERFORMANCE (%)				CUMULATIVE PERFORMANCE	
	Fund	Benchmark	Sector Average

FUND COMMENTARY

2022 begun with equity markets giving back after a strong 2021. Inflation and concerns about central bank tightening have made for a turbulent market. With that, the MSCI World Index closed the month down -5.29%. Despite mixed macro data in the US, the Fed took the spotlight as the S&P 500 Index posted similar returns, down -5.17% for the month. European equity market returns fared the same with the Eurostoxx Index losing -5.22% in US dollars for the month. The major markets in the east performed worse relative to Europe and America. In China, weak domestic demand caused by Covid outbreaks, lockdowns, and supply bottlenecks drove poor market performance. China's CSI 300 Index returned -7.70% for January whilst Japan's Nikkei 225 Index was down -6.18% for the month in US dollars. The broader emerging market performances were mixed and despite the negative contribution from China, the MSCI Emerging Market Index returned -1.89% for the month, significantly better than the developed counterparts. Local equity indices performances for January were primarily driven by Financials and Resources which were up +3.44% and +3.92% respectively. The Industrials, in contrast, gave back, down -1.98% whilst the rand strengthened +3.45%. The FTSE/JSE Capped Shareholder Weighted Index closed the month up +2.39%. The Fund was ahead of the benchmark, up +2.66% (gross of fees) for the month.

Contributors to Performance:

The positions that contributed most to the absolute performance of the fund for the month were Sasol (+33.17%), MTN Group (+12.54%), and British American Tobacco PLC (+12.65%).

Detractors from Performance:

The largest detractors from the month's absolute performance were Compagnie Financiere Richemont AG (-9.23%), Prosus NV (-3.36%), and AngloGold Ashanti (-12.72%).

PRESCIENT EQUITY FUND (A2)

GLOSSARY

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest performance: The highest and lowest performance for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Current Yield: Annual income (interest or dividends) divided by the current price of the security.

CPU: Cents Per Unit to the Glossary

Alpha: Denotes the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Dividend Yield: The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

PE Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.

Fund Specific Risks

% Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Information Disclosure

The portfolio has adhered to its policy objective and there were no material changes to the composition of the Fund portfolio during the quarter.

PRESCIENT EQUITY FUND (A2)

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
