

Omba Moderate Risk Global Allocation Fund

A sub-fund of Prescient Global Funds ICAV

Fund Factsheet – September 2022

Investors should read the Key Investor Information Document and Prospectus prior to investing

INVESTMENT OBJECTIVE

The investment objective of the Fund is to achieve capital appreciation over the medium to long term. The Fund aims to achieve this objective through investing (primarily through collective investment schemes structured as exchange traded funds) in a **GLOBAL and DIVERSIFIED portfolio of equity and fixed income securities** allocated across regions, countries, and sectors.

The Fund aims to be invested in a moderate risk portfolio of equity and fixed income securities where the risk profile could be considered comparable to a 50% global fixed income / 50% global equity allocation.

MARKET COMMENTARY

September 2022 was the worst month since March 2020 for both equity and bond markets. "There is no alternative" (TINA) has given way to "There is nowhere to hide" as bonds (iShares Global Corp. Bond ETF, -5.3% MoM, -6.1% QoQ, -20.3% YTD) and equities (MSCI ACWI \$, -9.7% MoM, -7.3% QoQ, -26.7% YTD) are both victims of higher discount rates. Inflation is proving stickier than expected (US CPI August, +8.3% YoY vs +8.1% YoY expected), forcing major central banks to raise rates to levels last seen before the Global Financial Crisis. During the same month, Fed, ECB, BoC raised policy rates by 75bps and BoE by 50bps. PBoC is the only major central bank currently easing to boost the slowing Chinese economy, but local markets (CSI 300, -6.7% MoM, -15.2% QoQ) couldn't escape global momentum. Investors now expect central banks to be more bearish for longer to tame inflation, therefore driving the risk-off sentiment witnessed in September and in Q3 overall. September was a record month for government yields as 10Y Gilt yields ended the month at 4.09% (+128.9bps MoM) but spiked to 4.58% intra-month, the highest level since 2008, after the British government announced its unfunded fiscal stimulus package. Sterling (GBPUSD, -4.0% MoM, -17.1% YTD) fell on the news, but UK equities (FTSE 100, -5.4% MoM), which derive much of their earnings offshore, performed in line with developed markets (in USD). US Treasury (US 10Y, +67.2bps MoM, +230.6 YTD) and German Government (DE 10Y, +57.6bps MoM, +229.0bps YTD) yields also rose sharply. Emerging market bond (Vanguard EM \$ Govt Bond ETF, -5.9% MoM) and equity (MSCI EM \$, -11.9% MoM) markets continue to suffer, following the direction of developed markets. However, US growth stocks (Nasdaq 100, -10.6% MoM, -32.8% YTD) have in fact underperformed emerging markets YTD, especially when one considers Brazil (Bovespa, +0.5% MoM, +11.7% QoQ) and India (Nifty 50, -3.7% MoM, +8.3% QoQ), which were glimmers of hope, finishing Q3 on a positive note and outperforming major US (S&P 500, -9.3% MoM, -5.3% QoQ), European (Stoxx 600, -6.6% MoM, -4.8% QoQ) and Asian (Nikkei 225, -7.7% MoM, -1.7% QoQ) indices. The strong USD (DXY, +3.1% MoM, +7.1% QoQ) is lifting American consumers' buying power but hurting non-USD earnings of American companies. Despite high inflation and rising rates, gold (LBMA Gold, -2.6% MoM, -7.4% QoQ) fell for the sixth month in a row, but its futures curve remains in contango, favouring spot buyers. Oil (Brent 1st month, -8.8% MoM, -23.4% QoQ) also continued to decline, finishing the month below \$90 on recession fears. In September, we closed our Latin America position and increased our Nasdaq exposure, following strong relative performance by Latin America. We made this change to take advantage of more attractive valuations in US growth (after the substantial drawdown YTD), but also to increase our US exposure which we believe will be more resilient and the first country to recover. We continue to add duration to our bond allocation by gradually increasing our position in 20+ year US Treasuries. We believe that the ultra-long part of the US Treasuries yield curve has reached unsustainably high levels and should be well-bid when softer economic fundamentals force the Fed to soften its stance. Over the month, our equities overweight and USD underweight were performance detractors. The high credit quality and lower weighted average duration of our bond allocation helped performance.

GLOSSARY OF TERMS

Annualised Volatility	Annualised volatility is a statistical measure of the magnitude of the historical daily (logarithmic) returns of the portfolio NAV, scaled to be representative of a full calendar year using a 252-day count. Only the NAV of trading days are used in calculating this measure.
Annualised Return	Annualised return is a measure which rescales returns, for periods greater than one year, to a 12-month geometric average return.
SFDR	The SFDR Metric is based on how the underlying holdings of the Fund are classified in terms of the EU's Sustainable Finance Disclosure Regulation. Some holdings may not be classified or may be classified as Article 6 (funds which do not integrate any kind of sustainability into the investment process) – these have been grouped as Other; Article 8 (a Fund which "promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices") or Article 9 (a Fund which "has sustainable investment as its objective").
Best/Worst 12-Months	Respectively, the maximum and minimum % change in NAV Per Share over a 12-month period using daily performance data.
NAV Per Share	Net Asset Value (NAV) Per Share represents the total market value of the portfolio less liabilities and divided by the number of outstanding shares.
Positive / Negative Month(s)	A month is positive (negative) if the NAV Per Share, of a specific share class, increases (decreases) in value from the last day of the previous month to the last day of the following month.
Risk Indicator	The risk indicator for the Fund is set at 4 as this reflects the market risk arising from the proposed investments. The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains.

DISCLAIMER

Shares in the Omba Moderate Risk Global Allocation Fund ("Fund") cannot be offered in any jurisdiction in which such an offer is not authorised or registered. Omba employees or agents are not responsible for providing you with legal, tax or other specialist advice and you should make your own arrangements in respect of this accordingly. Omba has based this document on information obtained from sources it believes to be reliable but which have not been independently verified. Omba is under no obligation and gives no undertaking to keep the information in this document up to date. No representation of warranty, express or implied, is or will be made, and no responsibility or liability is or will be accepted by Omba, or by any of its officers, employees or agents, in relation to the accuracy or completeness of this document or of any information contained within it. Accordingly, except in the case of fraudulent misrepresentation, neither Omba nor any of its officers, employees or agents shall be liable to any person for any direct, indirect or consequential loss arising from the use of this document.

The Fund is a sub-fund of the Prescient Global Funds ICAV, an open-ended umbrella type Irish collective asset-management vehicle with variable capital and limited liability and segregated liability between sub-funds registered with and authorised by the Central Bank of Ireland as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No. 352 of 2011) as amended. The Fund is managed by Prescient Fund Services (Ireland) Limited (the "Manager") of 35 Merrion Square East, Dublin 2, Ireland, which is authorised by the Central Bank of Ireland, as a UCITS Management Company. Authorisation of the Omba Moderate Risk Global Allocation Fund by the Central Bank of Ireland is not an endorsement or guarantee nor is the Central Bank of Ireland responsible for the contents of the prospectus. Authorisation by the Central Bank of Ireland shall not constitute a warranty as to the performance of the Fund and the Central Bank of Ireland shall not be liable for the performance or default of the Fund. Omba Advisory & Investments Limited, which is authorised by the Financial Conduct Authority in the United Kingdom, and by the Financial Sector Conduct Authority in South Africa (FSP 49101) of Cargo Works (Unit 4.04), 1-2 Hatfields, London, SE1 9PG, United Kingdom, is the Investment Manager, responsible for managing the Fund's investments. The Manager retains full legal responsibility for the Fund. Copies of the prospectus (including the UK Country Supplement, the supplement for the Fund) (together the "Prospectus"), the Key Investor Information Documents ("KIID") and the daily share prices are available free of charge from the Manager or on www.prescient.ie. The A and B share classes are approved offshore reporting funds in the UK. For further details please visit: <http://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>

Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant sub-fund, and the relevant subscription application forms, all of which must be read in their entirety together with the Prospectus, Supplements and the KIID. No offer to purchase shares will be made or accepted prior to receipt by the offeror of these documents, and the completion of all appropriate documentation. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by the Manager by or before 10:00am Irish time each business day. Where all required documentation is not received before the stated cut off time, the Manager shall not be obliged to transact at the net asset value price as agreed to and the application will be held over until the next Dealing Day. The Fund is authorised for distribution to non-qualified investors by the Swiss Financial Market Supervisory Authority FINMA. The Prospectus and the Supplements of the Funds, the Key Investor Information Documents ("KIIDs"), the Instrument of Incorporation as well as the annual and interim reports of the Company are available free of charge from the Swiss Representative 1741 Fund Solutions AG. The Swiss paying agent is Tellico AG.

The investments of the Fund are subject to market fluctuations and the risks inherent in all investments and there can be no assurance that an investment will retain its value or that appreciation will occur. Changes in exchange rates may have an adverse effect on the value, price and/or income of the product. Independent financial advice should be sought as not all investments are suitable for all investors. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential

limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. The price of shares and the income from shares can go down as well as up and investors may not realize the value of their initial investment. Accordingly, an investment in the Fund should be viewed as a medium to long-term investment. Past performance may not be a reliable guide to future performance. Prospective investors should consult a stockbroker, bank manager, solicitor, accountant, financial adviser or their professional advisers accordingly. Prices are published daily and are available on the Prescient website.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund invests in other Collective Investment Schemes that levy their own charges, which could result in a higher fee structure. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investors performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. The strategy performance has been simulated based on an actual portfolio designed in December 2016 and invested on 10 April 2017. The strategy performance is gross of management fees (0.3% p.a. plus VAT) and net of product costs of the underlying ETFs (no transaction costs or custody fees have been included in performance calculations as these fees will vary depending on one's broker). Gross income is reinvested and the portfolio re-balanced on a quarterly basis. Source: Morningstar.

The Fund's Total Expense Ratio ("TER") reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management and administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. These amounts may change without any notice although within the confines of the Fund Supplement.

Upon sourcing the underlying holdings within each of the fixed income and equity ETFs 94.7% are from 30 Sep 2022, 1.9% are from 23 Sep 2022, 3.4% are from 31 Aug 2022. Equity and fixed income metrics (such as Price-Earnings Ratios and Maturity) are as of 30 Sep 2022). Upon sourcing Equity Breakdown data from Refinitiv, unclassified data (which was not used) for each of the presented measures are: 0.01% for Company Market Cap data, 2.4% for Price-Earnings Ratio data, 18.9% for Dividend Yield data. Price-Earnings Ratio data from Refinitiv greater than 80 were capped at 80 (this amounts to 2.12% of Equity data). Within the Equity Breakdown section, Sector Breakdown is the sector to which each of the underlying companies are exposed (unclassified data: 0.03%). Country Breakdown is the country of headquarters for each underlying company (unclassified data: 0.00%) and Currency Breakdown is the currency in which each underlying company trades and it does not necessarily reflect the currency of exposure (unclassified data: 0.03%). Upon sourcing the Fixed Income Breakdown data from Refinitiv, unclassified data (which was not used) for each of the presented measures are: 2.18% for Time to Maturity data, 2.05% for Coupon data, 2.30% for Yield to Maturity (YTM) and 2.30% for Duration data. Yield to Maturity has been calculated as the lower of YTM and Yield to Worst.
