Total Investment Charges (TIC)	1.72%	1.40%

Where a transaction cost is not readily available, a reasonable best estimate has been used. Estimated transaction costs may include Bond, Money Market, and FX costs (where applicable).

FUND OBJECTIVE:

The Fund is priced in rands and its objective, expressed in US dollar terms, is to outperform global inflation while aiming to preserve capital over the medium term.

INVESTOR PROFILE:

Investors seeking to preserve the real value of their capital, in US dollar terms, by investing in a diversified portfolio of global assets. The recommended investment horizon is 3 years or longer. Since units are priced in rands, investors can invest without having to expatriate rands.

INVESTMENT MANDATE:

The Fund is a feeder fund and, other than assets in liquid form and currency contracts, invests only in one fund – the Prudential Global Inflation Plus Fund, a US dollar denominated fund domiciled in Ireland. Through this underlying fund, the Fund has exposure to a diversified portfolio that may include equity and property securities, cash, bonds and commodities. The Fund may invest up to 40% in equity securities (excl. property) and up to 25% in property securities.

INVESTMENT MANAGER OF THE UNDERLYING FUND:

M&G Investment Management Ltd (UK)

FUND MANAGERS OF THE UNDERLYING FUND:

Marc Beckenstrater and Craig Simpson

ASISA CATEGORY:

Global - Multi-Asset - Low Equity

BENCHMARK:

Global inflation

INCEPTION DATE:

1 March 2004

FUND SIZE:

R159 562 097

AWARDS:

Raging Bull: 2019

INCOME DISTRIBUTIONS	TOTAL DISTRIBUTIONS	12-MONTH YIELD
(A Class) 30 June 2020	0.00 cpu	0.00%
(A Class) 31 December 2019	0.00 cpu	0.00%
(B Class) 30 June 2020	0.00 cpu	0.00%
(B Class) 31 December 2019	0.00 cpu	0.00%

If the income earned in the form of dividends and interest exceeds the total expenses, the Fund will make a distribution. (cpu = cents per unit)

FUND COMMENTARY

Global equity markets were broadly positive in August on the back of advancements in the development of a Covid-19 vaccine, the broad-based resumption of global economic activity, and the announcement of a new approach to average-inflation targeting by the US Federal Reserve. In the US, investor sentiment was buoyed following the announcement that the Phase 1 trade agreement with China would go ahead as planned after the Trump administration continued asserting restrictions on Chinese Telecoms giant Huawei. Advance estimates confirmed that the US economy entered a recession after declining 31.7% q/q in Q2. In the UK, preliminary estimates showed that the economy shrank by 20.4% q/q in Q2, the largest contraction on record. The Bank of England (BoE), meanwhile, maintained its key bank rate at a record low of 0.1% and kept its bond-buying programme at GBP745bn. The BoE warned that Britain's economy may take longer to recover than initially expected, and that inflation would likely fall further below the 2% target. Meanwhile, the Euro Area economy also entered a recession after advanced estimates showed GDP contracting 11.8% q/q in Q2. The ECB maintained its EUR1.35trn Pandemic Emergency Purchase Programme (PEPP), but adjusted the net purchase envelope to be considered a ceiling rather than a target. In China, the PBoC kept its benchmark interest rates unchanged for the fourth consecutive month, amid signs of an economic recovery.

Looking at global market returns (all in US\$), the MSCI All Country World Index delivered 6.2%, the Bloomberg Barclays Global Aggregate Bond Index returned -0.2%, while the EPRA/NAREIT Global Property REIT Index posted 1.6%. The rand strengthened 0.5% against the US dollar, but weakened 1.5% against the pound sterling and 0.7% versus the euro.

Rand strength against the US dollar marginally tempered performance in August. In US dollar terms, the largest contributors for equities were US and Japanese equities, although most equity positions contributed. Exposure to listed property also contributed. In terms of fixed income, exposure to US Treasuries was the main detractor.

GLOSSARY

12-month yield	A measure of the Fund's income distributions as a percentage of the Fund's net asset value (NAV). This is calculated by summing the income distributions over a rolling 12-month period, then dividing by the sum of the NAV at the end of the period and any capital gains distributed over the same period.
Annualised performance	The average amount of money (total return) earned by an investment each year over a given time period. For periods longer than one year, total returns are expressed as compounded average returns on a yearly basis.
Cumulative performance graph	This illustrates how an initial investment of R100 or N\$100 (for example) placed into the Fund would change over time, taking ongoing fees into account, with all distributions reinvested.
Income distribution	The dividend income and/or interest income that is generated by the underlying Fund investments and that is periodically declared and distributed to investors in the Fund after all annual service fees.
Information ratio	Measures the Fund's active return (Fund return in excess of the benchmark) divided by the amount of risk that the manager takes relative to the benchmark. The higher the information ratio, the higher the active return of the Fund, given the amount of risk taken and the more consistent the manager. This is calculated over a 3-year period.
Maximum drawdown	The largest drop in the Fund's cumulative total return from peak to trough over any period.
Monthly volatility (annualised)	Also known as standard deviation. This measures the amount of variation or difference in the monthly returns on an investment. The larger the annualised monthly volatility, the more the monthly returns are likely to vary from the average monthly return (i.e. the more volatile the investment).
Percentage of positive rolling 12 months	The percentage of months, since inception, that the Fund has shown a positive return over a rolling 12-month period.
Sharpe ratio	The Sharpe ratio is used to measure how well the return of an asset compensates the investor for the risk taken. The higher the Sharpe ratio the better the Fund's historical risk-adjusted performance has been. This is calculated by taking the difference between the Fund's annualised return and the risk-free (cash) rate, divided by the standard deviation of the Fund's returns. This is calculated over a 3-year period.
Sortino ratio	This is calculated by taking the difference between the Fund's annualised return and the risk-free (cash) rate, divided by the downside deviation of the Fund's returns i.e. the "bad" volatility. A high Sortino ratio indicates a low risk of large losses occurring in the Fund. This is calculated over a 3-year period.
Total Expense Ratio (TER)	This shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated for the year to the end of the most recent completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
Unit class	Prudential's Funds are offered in different unit classes to allow different types of investors (individuals and institutions) to invest in the same fund. Different investment minimums and fees apply to different unit classes. A Class: for individuals only. B & D Class: retirement funds and other large institutional investors only. X Class: the special fee class that was made available to investors that were invested in the Dividend Income Feeder Fund. T Class: for investors in tax-free unit trusts. F Class: for Discretionary Fund Managers.

DISCLAIMER

Prudential Portfolio Managers Unit Trusts Ltd (Registration number: 1999/0524/06) is an approved CISA management company (#29). Assets are managed by Prudential Investment Managers (South Africa) (Pty) Ltd, which is an approved discretionary Financial Services Provider (#45199). The Trustee's/Custodian details are: Standard Bank of South Africa limited – Trustees Services & investor Services. 20th Floor, Main Tower, Standard Bank Centre, Heerengracht, Cape Town. Prudential Portfolio Managers (South Africa) (Pty) Ltd ("PPMSA") is part of the same corporate group as the Prudential Assurance Company. The Prudential Assurance Company is a direct subsidiary of M&G plc, a company incorporated in the United Kingdom. Neither PPMSA or the Prudential Assurance Company are affiliated in any manner with Prudential Financial, Inc., a company whose principal place of business is in the United States of America or Prudential plc, an international group incorporated in the United Kingdom.

Collective Investment Schemes (unit trusts) are generally medium-to-long-term investments. Past performance is not necessarily a guide to future investment performance. Unit trust prices are calculated on a net asset value basis. This means the price is the total net market value of all assets of the unit trust fund divided by the total number of units of the fund. Any market movements – for example in share prices, bond prices, money market prices or currency fluctuations – relevant to the underlying assets of the fund may cause the value of the underlying assets to go up or down. As a result, the price of your units may go up or down. Unit trusts are traded at the ruling forward price of the day, meaning that transactions are processed during the day before you or the Manager know what the price at the end of the day will be. The price and therefore the number of units involved in the transaction are only known on the following day. The unit trust fund may borrow up to 10% of the fund value, and it may also lend any scrip (proof of ownership of an investment instrument) that it holds to earn additional income. A Prudential unit trust fund may consist of different fund classes that are subject to different fees and charges. Where applicable, the Manager will pay your financial adviser an agreed standard ongoing adviser fee, which is included in the overall costs of the fund. A Collective Investment Schemes (CIS) summary with all fees and maximum initial and ongoing adviser fees is available on our website. One can also obtain additional information on Prudential products on the Prudential website. The Fund may hold foreign securities including foreign CIS funds. As a result, the fund may face material risks. The volatility of the fund may be higher and the liquidity of the underlying securities may be restricted due to relative market sizes and market conditions. The fund's ability to settle securities and to repatriate investment income, capital or the proceeds of sales of securities may be adversely affected for multiple reasons including market conditions, macro-economic and political circumstances. Further, the return on the security may be affected (positively or negatively) by the difference in tax regimes between the domestic and foreign tax jurisdictions. The availability of market information and information on any underlying sub-funds may be delayed. The Manager may, at its discretion, close your chosen unit trust fund to new investors and to additional investments by existing investors to make sure that it is managed in accordance with its mandate. It may also stop your existing debit order investment. The Manager makes no guarantees as to the capital invested in the fund or the returns of the fund. Excessive withdrawals from the fund may place the fund under liquidity pressure and, in certain circumstances, a process of ring-fencing withdrawal instructions may be followed. Fund prices are published daily on the Prudential website. These are also available upon request. The performance is calculated for the portfolio. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Purchase and repurchase requests must be received by the Manager by 13h30 (11h30 for the Money Market Fund) SA time each business day. All online purchase and repurchase transactions must be received by the Manager by 10h30 (for all Funds) SA time each business day.
