**Investment objective (summary of investment policy)**

The PSG Money Market Fund’s objective is to provide capital security, a steady income and easy access to your money. The fund invests in selected money market instruments issued by government, parastatals, corporates and banks with a maturity term of less than 13 months. The fund operates within the constraints of Regulation 28 of the Pension Funds Act.

**Who should consider investing?**

Fund specific risks: The fund sits at the bottom of the risk/reward spectrum. A money market fund offers a secure investment, but is not completely risk free and severe losses may reduce the capital value of the portfolio. The portfolio is exposed to default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments.

This fund is suitable for investors who:

- seek capital stability, interest income and easy access to their money through a low-risk investment
- need an interim investment vehicle or ‘parking bay’ for surplus money
- have a short-term investment horizon

**Risk/reward profile**

**Fund details**

- **Inception Date**: 19 October 1998
- **Fund manager**: Lyle Sankar and Duwayne Le Roux
- **Fund size (ZAR)**: R 942 347 519
- **Latest Distribution (cpu)**: 0.2583 ; 0.2794
  - 30 Nov 20 - 31 Oct 20
- **Monthly distribution**:
  - 31 Jul 20 - 0.3518
  - 31 Jun 20 - 0.3625
  - 31 May 20 - 0.4529
  - 30 Apr 20 - 0.4975
- **ASISA sector**: South African - Interest Bearing - Money Market
- **Benchmark**:
  - (ASISA) South African - Interest Bearing - Money Market Mean
- **Minimum investment**: R25000 lump sum
- **Regulation 28 Compliant**: Yes

**To invest**

This class is only available to existing investors. Speak to your financial adviser or visit www.psg.co.za. Cut-off time for daily transactions are determined by investment platforms.
This chart shows you how the performance can vary over time. It is an indication of the distribution of historical rolling returns from the portfolio over each rolling 12-month period.

What is a total expense ratio?

The Total Expense Ratio (TER) is the annualised percentage of the Fund’s average expenses over management that has been used to pay the Fund's actual expenses over the past three years. This percentage of the Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee is payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

**Disclaimer**

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

Money Market

The PSG Money Market Fund maintains a constant price and is targeted at a constant value. The quoted yield is calculated by annualising the average 7 day yield. A money market portfolio is not a bank deposit account. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed. The total return to the investor is made up of interest received and any gain or loss made on any particular instrument. In most cases the return will merely have the effect of increasing or decreasing the daily yield but in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio.

**Regulation 28**

The fund is managed according to Regulation 28 of the Pension Funds Act. The South African retirement fund industry is governed by the Pension Funds Act No. 24 of 1956. Regulation 28 of the Pension Fund Act prescribes the maximum limits in asset classes that an approved retirement fund may invest in. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period.

**Performance**

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Cut-off time is determined by the platform. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.
