MANAGED BY: ROBERT COWEN INVESTMENTS (PTY) LTD - AUTHORISED FSP 701

INVESTMENT OBJECTIVE

The RCI BCI Flexible Fund is a flexible portfolio that aims to secure a high capital growth and a reasonable level of income for investors.

INVESTMENT POLICY

The portfolio is managed with the aim of delivering positive returns over the medium term in excess of CPI plus 4%. We hope to achieve this by actively managing the asset allocation of the portfolio to reduce downside risk. The portfolio invests in a mix of shares listed on recognised exchanges, gilts and liquid assets. The bulk of the portfolio is invested in 20 to 30 shares picked from a pool of the 100 most marketable shares on the Johannesburg Securities Exchange. Up to 30% may be invested in offshore shares, (of which, up to 20% may be invested in the RCI BCI Worldwide Flexible Fund in which case the management fee thereon will be rebated to prevent double fees being charged) the bulk of which will be in consumer related shares where the demand for their products is largely unaffected by economic conditions. The manager makes the investment decisions based on a combination of market behavioural analysis, fundamental analysis and quantitative analysis. The portfolio may from time to time invest in listed and unlisted financial instruments. The manager may include the following unlisted financial instruments: forward currency, interest rate and exchange rate swap transactions.

RISK PROFILE

Moderate - High Risk

- This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long term investment returns could therefore be higher than a medium risk portfolio.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long term investment horizons.
